YEARLY SAVINGS OF \$2,000,000,000 SOUGHT IN COAL

Declared Possible With General Use of Methods Now Practiced by Some

FURNACE LOSS LINKED WITH MINING WASTES

Distribution Economies Also Urged Through Mergers and Abolition of Cross-Hauls

Recurring coal strikes—such as the one which has been under very for siz months in a large section of the American bituminous fields— are a challenge to the Nation to reare a challenge to the Nation to re-move fundamentally unsatisfactory conditions in one of its key indus-tries. To contribute to a better un-derstanding of these problems, The Christian Science Montror is pub-lishing a series of articles, discuss-ing the underlying problems in this industry, of which the following is the fourth.

Provisional Agreement on Two Articles of Convencers as near to knowing how to eat his cake and have it, too, as anybody who owns a coal mine in the United States. As is fairly well known, Mr. Ford manufactures motorcars, and for this purpose he needs steel. To make steel, Mr. Ford needs coke. Coke comes from soft coal. But coke—and here is the point—is only one of the by-products of ordinary soft coal; the other by-products are numerous and valuable.

Many of the manufacturers who unite to produce the 50,000,000 tons of coke used annually in the United States, let the other by-products escape, but that is just what Henry Ford does not do.

In four minutes the Ford coking plant converts a ton of bituminous coal into:

8000 cubic feet of gas

8000 cubic feet of gas
10 gals. of gasoline
20 lbs. of ammonium sulphate
30 gals. of crude light tar
3 gals. of creosote oil
2 gals of crude lubricating oil
10 lbs. of grease
1500 lbs. of coke

Bearing on Coal Strike

ally, about one-half still comes in bee-hive ovens. This condi-n persists even in the face of the

Art Galleries Race for National Honors

for Nation Berry Breing Chicago Chicago usually

Chicago

ART museums are not usually
A found racing each other, but
that is just what is going on between the Metropolitan Museum of
Art in New York and the Chicago
Art Institute. It is not a race for
art treasures, however, but for attendance records.

For five or six years the attendance at both has held close to the
1,000,000 mark, ho no ras being
divided. On Labor Day Chicago
went 2000 ahead of New York, the
Metropolitan having 6435 guests,
while the Chicago gallery was
visited by 8763, which fact was duly
published. But New York does not
admit defeat, and new figures will
doubtless be forthcoming.

Geneva Draws Nearer Accord on Trade Rules

Provisional Agreement on

After a long discussion in subcommittee a provisional agreement has also been reached concerning the definition of material which should come under the heading of national defense. The result is that there is now hope that a convention may be signed by the delegates of the conference next week, which will finally be ratified by the governments concerned. In this way a certain number of prohibitions and restrictions will, it is believed, be removed, which will not only assist in a revival of trade but will improve the political

Bearing on Coal Strike

Mr. Ford manages to get his coke and his by-products, too. What he, with other progressive industrialists, do with their coal links up directly with the problems hyvolved in the present protracted coal strike. The root of the difficulty in the soft coal business, which Herbert Hoover has called "the worst functioning industry in the country," is overproduction and waste.

If all manufacturers used their coal emicently the Nation would be maved an enormous bill for wastage that is passed on to the consumer in the cost of manufactured articles. Furthermore, and more particularly, by reducing demand, such savings would lower prices and drive out of production the less efficient and more expensive mines—a surplus which today clutters the industry.

But the fact is that few coal users have adopted such methods. The common saying is that coal is too cheap to be economized. Official figures have already shown that present methods of mining soft coal leave at least one ton in the ground for every two tons taken out. The same tale of waste is carried on in the use to which the coal is put after it is mined.

The old-fashioned bee-hive oven, which is used in coking, does not save the by-products of coal. Of 50,000,000 tons of coke produced annually, about one-half still comes from bee-hive ovens. This condiing and co-ordinating tariff headings and subheadings proved to be, the experts have succeeded in devising a scheme which offers, for the five countries which took part in this conference, a framework in which conference, a framework in which he said.

The classification, moreover, is established on a simple logical basis, and the scientific clarity of this nomenclature will greatly facilitate customs administration and business generally. It will now be for the economic committee of the League to examine the report of the experts and to communicate their view of its value to the Governments concerned.

The general opinion is that the work achieved by the experts in simplifying tariff nomenclature will be adopted not only by the five countries, but will afford a model for other states.

Valiey should support.

William E. Borah (R.), Senator from Idaho, who was to speak, but could not attend, sent word that he favored a permanent flood control plan, on an unstinting and lasting scale, with the best available expert ability, so that the job could be done thoroughly.

Joseph E. Ransdell (D.), Senator from Louisiana, sald that protecting its value to the Governments concerned.

The general opinion is that the polyono,000 acres in the Mississippi Valley lowlands was a greater rengineering problem than a combination Identically the favored a permanent flood control plan, on an unstinting and lasting scale, with the best available expert ability, so that the job could be done thoroughly.

Joseph E. Ransdell (D.), Senator frow Louisiana, sald that protecting in the 19,000,000 acres in the Mississippi Valley lowlands was a greater engineering problem than a combination of all the irrigation projects in the West so far undertaken, and declared it was even greater than of recall decessor, same time.

Rail Merger in Northwest Will Help All, Backers Feel

Lines Would Manufacture Own Equipment-New Industries Would More Than Offset Payroll Losses, They Say

MINNEAPOLIS, Minn.—The building up of a self-contained system, actuding the purchase of raw maerials, the manufacture of all equipment and the expenditure of its nav ing up of a self-contained system, including the purchase of raw materials, the manufacture of all equip-

terials, the manufacture of all equipment and the expenditure of its pay roll money in the Northwest, is contemplated by the Great Northern and Northern Pacific railways in their plan of unification, according to testimony offered before the Interstate Commerce Commission here.

A statement issued jointly by Ralph Budd, president of the Great Northern, and Charles Donnelly, president of the Northern Pacific, declared that the development of new industries as a sequel to the merger would more than offset the pay roll loss resulting from a curtailment of shop activities.

The manufacture of locomotizes and freight cars on a big scale is

and freight cars on a big scale is included in the program outlined by the two rallway chiefs. The plan contemplates the building of some 40 locomotives each year, at a cost

FLOOD CONTROL RIGHT-OF-WAY IS DEMANDED

Pointed Out That Active Effort Is Needed to Obtain Legislation

NEW ORLEANS, La.-Right of way must be given flood control in the coming Congress and the South must take every advantage of an opportunity that may never come again is the gist of the meeting of the two-day session of the Southern States Republican League here.
"When anyone takes a billion dol-lars out of the United States Treasury for anything," said Frank R. Reid

(R.), Representative from Illinois, "they are going to have to show some mighty good reason for it, and it can't be done without a vast amount of hard work and interested effort. The South will never have another chance like the present one to obtain the enactment of flood control legis-lation, and the whole purpose may fail unless every ounce of available support is brought to bear."

support is brought to bear."
Mr. Reid, who is chairman of the
House Flood Control Committee, said
that the South needs to take more
interest in a national flood control
program to insure its adoption by the Government.

he said.

The league voted to authorize its president, Charles U. Gordon of Greenville, Miss., to appoint a committee to aid in securing the passage of flood control legislation by Congress. Another resolution thanked President Coolidge for his prompt attention in providing relief.

While several speakers indicated they believed the meeting ought to advance some plans for rellef, the league indorsed the policy of awaiting the report of the United States

TOWARD TREATY WITH THE POLES

BERLIN, Oct. 29-The first step toward a resumption of Polish-Ger-man negotiations for a commercial treaty, which had been interrupted for many months was taken by Dr. Gustav Stresemann, when he discussed with the Polish Minister in Berlin the commercial relations between the two countries.

between the two countries.

One of the principal obstacles to be overcome on the German side is the opposition of the farmers to the importation of Polish hogs and potatoes. The land barons' position is a very strong one at present, since their interests are protected by the German Nationalist who almost hold a majority in the Cabinet.

Poland's threat of raising its tar-iffs on goods coming from countries.

commercial treaty, and the constant pressure exercised on the German Government by an industry which needs the Polish market, however, is gradually wearing down the opposition of the farmers.

OPINION DIVIDED ON BARRON VIEW

Some Say It Is "Too Sweeping an Indictment" to Be Substantiated

OTHERS PARTIALLY AGREE WITH HIM

Many See Room for Improvement-Interesting Comment Offered by Leaders

SPECIAL FROM MONITOR BURRAU NEW YORK-Opinions expressed NEW YORK—Opinions expressed by Clarence W. Barron, economist and publisher, to the effect that edu-cation has failed in a proper contri-bution to the business life of the Nation, are viewed by business men and educators here as too sweeping an indictment to be possible of sub-

A Banker's Viewpoint

While leaders here are frank in the expression of the need of im-provement in educational facilities, Says Costly Competition
Must Give Way to Improved Methods

SPECIAL FROM MONITOR BUREAU
NEW YORK—Denouncing costly

Schwah

Provement in educational facilities, and are in accord with Mr. Barron in a desire for augmenting the practicability of collegiate training, they declare that a great contribution has been made by the universities and that preparation for even greater service is continually being carried on which cannot be swept aside with any casual gesture.

aside with any casual gesture.

A representative business viewpoint was expressed by George E.
Roberts, vice-president of the National City Bank. For a number of years the National City Bank has recruited a part of its personnel from among the new college grad-uates. Men from the leading universities are selected and placed in smaller positions, from which many have risen to posts of importance in

the institution.
"Our experience with college grad-uates has been very satisfactory," Mr. Roberts said.

"I cannot entirely agree with Mr. Barron. I am not an expert upon education, and I feel that it is endirection, and I rect that the service open to some criticism. Still it must be admitted that they are doing some very excellent work

wery excellent work.

"The tendency of higher education to draw a line between crudition and business pursuits is less marked now than it was formerly. Mr. Barron's examples of men such as Ford, Wright, Edison, and Vanderbilt as products of the commercial and business world is not entirely relevant."

The growing tendency among edu-cators to recognize the need for turning education to direct practical account was cited by Dr. William J. O'Shea, superintendent of schools

less to pour academic knowledge into the curriculum for children who are not able to assimilate it. This in an industrial world and we cannot overdo the development of men and women trained to meet the current

"But educators throughout the entire country are fully alive to the need and many important steps are being taken in the improvement of vocational and business education.

"Personally I am in favor of vocational guidance throughout the high schools and the development of a system under which competent aid could be given to the students to help them determine the lines which they wish to follow and to prevent the man who really should be a lawyer from getting the training that would fit him for the work of a mechanic."

Statements "Too Sweeping"

There is a "certain grain of truth" in what Mr. Barron says, but his statements are "too sweeping and cannot be entirely substantiated." according to Prof. James S. Hosic, professor of education of Columbia University and director of extramural courses.

"I believe that the needs in edu-cation, which Mr. Barron points out

of the present time," Professor Hosic said.

GERMANS DENY

ARTIFICIAL DEFICIT

BY WINELESS

BERLIN, Oct. 29—Dr. Körler, Minister of Finance; Halmar Schacht, president of the Reichsbank, and Seymour Parker Gilbert, Agent-General for Reparations, are now busy discussing teh German budget for next year.

Dr. Köhler, in a statement to the foreign press yesterday, emphasized the Reich's intention of living up to its obligations under the Dawes scheme, and denied all rumors that the Government is trying to introduce an artificial deficit by increasing its expenditure, in ogdet to escape paying reparations.

OF EDUCATION

"From certain points of view, what Mr. Barron says especially about the older colleges may be more or less true," Dr. Veit said. "But we are beginning to feel that the chief necessity of education is to fit the student for the complex environment which he will encounter when he enters life.

A Pertinent Reply

"Training throughout the junio chools is being approached, not so

"Mr. Barron ignores two funda-mental facts in taking the stand that education is not properly related to business progress. The first is that since the World War education has

of almost every secondary school.
"The second vital fact is that business, through offering much greater rewards than pedagogy, attracts those who are best qualified to enter the teaching field. What school the teaching field. What school today could offer an inducement suf-ficient to obtain the services of the Vanderbilts, the Rockefellers and the Henry Fords, whom Mr. Barron menvanderbilts, the Rockefellers and the Henry Fords, whom Mr. Barron mentions as the product of commercial life rather than educational processes?"

more so than in such an international conference.

"A second shadow was the result of the withdrawal of Lord Cecil from the British Government and the

RACIAL GROUPS HOLD FESTIVAL

has just returned from a tour of European countries, said that in 25 German communities as well as in little support to the disarmament Great Britain, he discovered a defi-work of the League, but I really could not see that his withdrawal nite trend toward an international consciousness and a wistful reaching out toward a brotherhood of man.

"I believe," he said, "that international peace will prevail, for even tional peace will prevail, for even German militarists with whom I talked respond heartily to the conception that the progressive consciousness of mankind is evolving an international state which shall include France. Germany, Alsace-Lorraine and all other territories, and shall assure the free self-determination of all peoples and the unhampered exchange of the best material and spiritual products which each racial group can contribute to the common life.

"In England likewise it seemed to me that beneath the current contests between the Conservatives who are in power and the Labor movement which hopes to be again in power, there is a growing, dominating sense of internationalism. Labor leaders especially are realizing that in their struggle for better standards of life for the under-privileged masses, they need and have the support of progressive people in other countries. Thus the basic issues of life are becoming consciously international. for the under-privileged masses, they need and have the support of progressive people in other countries. Thus the basic issues of life are becoming consciously international. "The fundamental distinctions to

At the same time experiments by the American bureau of standards just announced show guayule rubber, produced from a shrub grown in Mexico and California, if properly prepared, to compare favorably with plantation Hevea rubber. The difficulties incidental to gathering the rubber from the widely separated areas of northern Mexico where it abounds have interfered with past tests, particularly as the rubber undergoes deterioration in the branches of the shrub after the latter have been cut. At the same time experiments

OCEAN FLIGHTS HELD FEASIBLE

Lieut. Hegenberger Believes Radio Beacon Will Revo**lutionize** Navigation

CAMBRIDGE, Mass. (A)-Trans CAMBRIDGE, Mass. (P)—Transoceanic flying with a good airplane
and equipment, favorable weather,
and the aid of the Army Air Corps,
has about as much "kick" to it "as
an attempt to get 100 per cent on a
condition examination in physics," in
the opinion of Lieut. Albert F.
Hegenberger, who flew to Hawaii
with Lieut. Lester J. Maitland last
summer.

Lieutenant Hegenberger's ideas were expressed in an article in the Technology Review, published by the Massachusetts Institute of Technology. The lieutenant, who studied

nology. The lieutenant, who studied aeronautical engineering at the institute, described the flight and the technical equipment used.

The ocean flights of the last summer, he believes, proved the feasibility of building airplanes with power plants of sufficient capacity to provide a cruising radius of 3000 miles and with the instruments available and now being perfected planes can be mavigated "as accurately and dependably over water as can surface pendably over water as can surface craft." With perfection of the radio beacon he expressed the opinion that aerial and marine navigation will be revolutionized.

Comparing airplanes and dirigi-bles, Lieutenant Hegenberger said both have a field. He predicted that airplane lines eventually will serve as feeders to lines of dirigibles.

The development of war."

Frank O. Darvall of the University of Reading presented a convincing argument pointing out that pacifism is not a group activity but an individual one: that everyone is convinced of the brutality of waf, but that the task of the present generation is to end war by searching out and dealing with deep seated maladjustments of society, taking steps to see that nations understand each other, and providing machinery for the peaceful settlement of disputes which may result in war.

Mr. Darvall was witty and wise,

Mr. Darvall was witty and wise and, without taking himself heavily managed to inject into an otherwise edious business an element of sound common sense and construc-tive proposals. But his efforts were apparently unavailing, for at the end the judges, which were the audience, gave the decision 247 to 123 in favor of the affirmative.

John Ramage of the London School-of Economics could think of things more horrible than war—collapsed currencies, for instance, he said. He elieved that war as a brutal method of settling difficulties, should be out-lawed, but he did not believe that pacifism was the respectable way to

nising pacifism was not an attempt place mostly on the Harvard side, and if there is an authority upon the art of debating, and he was present, he must have pondered seriously over some of the indiscretions taken with the delicate laws of thrust and with the delicate laws of thrust and was not an attempt to get at the causes for war and that proof that the affirmative had seen the handwriting on the wall could be found in the fact that none of its speakers had attempted to justify pacifism.

parry; but a good purpose was served because, at the last, all six gentlemen seemed in perfect agre-

gentlemen seemed in perfect agremnt about pacifism.

A. Frank Reel, Harvard 28, president of the debating council, was the
first speaker, but he seemed to have
failed to fortify himself at all with
a definition of the word pacifism. He
creditably lamented the lost days of
true chivalry—as they have been
pletured in story peoks—and tooks. true chivairy—as they have been plctured in story books—and took a stand on the brutality of war with such solemnity that not a few wondered if he believed anyone actually approved the brutality of war.

COL. LINDBERGH LONGS FOR QUIET

Gives Dinner to Reporters and Photographers-Only One Speech Made

SPECIAL FROM MONITOR BURRAU NEW YORK-A dinner to news paper reporters and photographers "covered" his "take-off" on the first non-stop flight from New York

to Paris, has just been given here by Col. Charles A. Lindbergh. Only one speech was made during the evening, when Colonel Lindbergh thanked those who had co-operated with him at-Curtiss Field during the days of preparation for his flight, and those who had met him upon his return.

"I hope things will quiet down now, so that I can return to normal again" he said.

Colonel Lindbergh expects to leave here Monday for Selfridge Field, Mich., to witness the army service maneuvers, after which he will pass a few days with his mother in Detroit, and then go to St. Louis. No announcement of his future plans will be made until after he returns to New York, he said. Colonel Lindbergh was the guest of the editorial staff of The New York Times at a luncheon just given at The Times Annex, at which Mrs. Woodrow Wilon was also a guest.

Pierce Petroleum Corporation reports for the quarter ended September 30, 1927, profit of \$225,244 after interest, depreciation, etc., compared with \$120,239 in the third quarter of 1926. Profits for the first nine months of 1927 totaled \$152,304, compared with a net loss of \$15,344 in the like period of 1926.

Our 55th Anniversary Sale Begins Monday

Celebrating with extraordinary values 55 years of service to New England

Picture, if you will, the extent of our preparations for this sale. The heads of our one hundred departments have been planning and working to collect the values since last June. They have travelled thousands of miles in this country as well as in Europe.

Factories have been busy making merchandise to meet our standard of quality and specifications that we might present these unusual savings.

An extra force of salespeople almost as large as our regular force has been employed and trained to serve you courteously and promptly.

Our service department has added many extra people-extra cashiers, extra packers, extra delivery men, extra trucks-all that our service may be maintained during this great event.

> Watch for the announcements of special events planned every day for the next few weeks.

MARCH ON ROME TO BE OBSERVED OVER ALL ITALY

Fascism to Celebrate Its Fifth Anniversary-Message From Mussolini

BY WIRELESS VIA POSTAL THE BURAPE ROME, Oct. 29-Fascism will celerate tomorrow the fifth anniversary of the march on Rome and comes the sixth year of its rule over Italy. The anniversary of the advent of Faccism to power should have been held yesterday, but Benito Mussolini, the Prime Minister, in order to avoid the Prime Minister, in order to avoid the loss of a working day in the country ordered the celebrations postponed till Sunday. Manifestos recording the Fascist revolution are published by all the public bodies in Italy, Signor Mussolial issuing a stirring message to the Black Shirts, which appeared in a special edition of the Foglio d'Ordini, the official Fascist bulletin.

The Duce briefly recapitulates the achievements of Fascism during the past year—the victorious defense of the lira, house rents legislation, the promulgation of the Labor charter, besides the completion of a great number of railways, roads, acqueducts, public works, schools and similar enterprises.

Italy Being Transformed These works, affirms the Duce, bear witness that Fascism is transforming Italy, and increasing its strength in all fields.

in all fields.

The year closes with a review of the armed legions, and with a "solemn warning to whomsoever fosters the foolish idea of trying to obstruct our path." To persevere in perfect discipline and devotion is the Duce's motto for next year. The message concludes with the words, "The cry of our faith, our conquest must pass beyond our horizon and be heard distinctly from afar."

Oct. 28 is now assuming the same significance in Italy as July 14 in France. It is realized that it is a festival marking the rebirth of the

restival marking the rebirth of the nation, and although no popular re-joicings as are held in France on July Joseph as at a least a result of the late is regarded as having the same importance as those recording the completional visitors. Day tion of Italian unity and Victory Day

Recent Police Court Decision on Grevhound Racing Raising Much Comment

T WIRELESS FROM MONITOR BUREAU POSTAL TELEGRAPH FROM HALIFAX LONDON, Oct. 29-The setback to gambling, caused by the London police court's decision that the betting as hitherto conducted at the white City greyhound races there is illegal, has caused a sharp fall in the share quotations of this class parenthetical entry of the equivaof enterprise. The decision being based only upon a technicality, howout to suppress betting establishments, prohibited any "house, office, room, or place" where gambling was The resolutions will be submitted

The House of Lords Judicial Commakers there were not given any per-manent location. It was this which the court now holds has been done at the White City. Only small modifications are considered necessary therefore to evade the law and these

are now being carried out. This leaves the main issue, whether greyhound gambling is illegal, still be fought out and the Anti-Gambling League proposes to raise this by further prosecution, claiming that the White City stadium is itself a "betting place" within the meaning of the act. In the meanwhile the opinion is expressed by Sir Thomas Rowbotham, Spencer Hogg, County Court judge; Sir William Milligan and other authorities that greyhound gambling is doing widespread harm, especially among young men and

omen.
The Westminster Gazette, supporting this view, urges the appoint-ment of a royal commission to revise ment of a royal commission to revise the whole question of the gambling laws, adding "if betting on grey-hound racing, why not on football; Yet we know that men responsible for cup and league football, now a tremendous organization, take the most drastic steps to keep the game free from professional bookmakers."

12. English Freemasonry's Influence on Craft in Other Nations

CO-OPERATION WITH AMERICAS SOUGHT

By SIR ALFRED ROBBINS of the world, as the Grand Lodge of England is everywhere recognized to be, should become more described at first hand with ognized to be, should become more closely acquainted at first hand with the Masonic conditions of other coun-

Do the Freemasons of the United States feel a similar need? Undoubt-edly, and some of them have shown it in even more active ways than mere visitation. The Grand Lodges of Massachusetts and New York in par-ticular have within the last few years displayed keen interest in Ma-sonic affairs outside the confines of the United States. A recent Grand Master of Massachusetts has paid a special visit of inspection to various countries in South America, as well as in the Panama Zone, while suc-cessive Grand Masters of New York, accompanied by certain of their lead-ing Grand Officers, have been in Eu-rope, Asia, and Africa on the like errand. These latter have stimulated a fresh growth of Masonry in the newly freed countries which have come into organized being as a result of the Great War.

First Actual Foreign Visit In the case of England, there had been for years a growing practice of prominent Grand Officers going abroad to assist in great Masonic

visited 10 American Grand Lodges, and addressed Masonic gatherings in 20 cities in the eastern states and the middle West. Even this was to leave 39 American Grand Lodges in the South and far West unvisited, though I had pressing invitations from many of them. It will be the lot of some other to receive from these the like wonderful welcome to that which was accorded to me.

In all the Masonic centers I visited
I made it clear that the Grand Lodge of England was not seeking for allibetter understanding by clearer knowledge of the special circumstances affecting every Sovereign Jurisdiction. My belief was, and is, that that better understanding and between knowledge can best be seen clearer knowledge can best be seouent personal intercourse among those associated with the various Masonic governments throughout the world. And I returned, after adpared in the various has been directed to take the control of the organization out of politics. Originally Freemasonry was a political movement, he said. It has world. And I returned, after adpared a part in the Republic for many years. The patriot priest, Grand Lodges and Grand Masters de-Hidalgo, father of Mexican independant. dressing through their respective Grand Lodges and Grand Masters decidedly more than a million and a quarter American Freemasons, con-vinced that this method of approach-ing the problem would prove most fruitful for good.

Toleration an Essential

But I was just as strongly confinced that this would only be so it inced that this would only be so it in the limits of political basis, with about 1500 Sociotish Rite Masons, Mr. Ramos said, and active membership of a total active membership of a total active membership or a total active membership on a total active membership or a total sound 30,000. This number is grow-instance and power of Free cashly observed than readily accounted for; but they had constantly and a membership or a total active membership or a total active membership or a total active membership or a total sound and power of Free cashly observed than readily accounted for; but they had constantly accounted for;

other.

The consideration which weighed on me in respect to North American Masonry was even more marked in the case of South American. The vastness of the Continent is such that I had in each portion to limit my investigations, and this time to the three Republics on the Atlantic teachers Argenting Uruguay, and injectiousness.

a reverential belief in the Eternal, and an inner realization of His revealed will and word. And, believing in both the Fatherhood of God and the Brotherhood of Man, its strict code of ethics teaches the highest virtues of citizenship, while leaving the individual the utmost freedom of judgment as to how these shall be exercised. The fundamentals being accented, it emphasizes, in regard to exercised. The fundamentals being accepted, it emphasizes, in regard to divergences in methods of Masonic government and practice, the old tolerance: "In essentials, unity; in nonessentials, diversity; in all things, charity."

Promoting Public Good

But are these points, whatever their interest, of practical importance to those outside Freemasonry? My belief is that more and more they will prove of the greatest importance in the promotion of the public good. My conviction is that the Masonic body, standing for freedom of thought and liberty of action on the vantage

Mr. Justice Shearman; Sir Douglas McGarel Hogg, Attorney-General; Lord Warrington, formerly Lord Chief Justice; Judge Turner, and Judge Randolph.

TOMAS A. RAMOS TELLS OF MEXICAN MASONRY

Washington Freemason in that Republic, is outlined in an interview given by Tomas A. Ramos. Grand Commanth the Bible to be called into requisitions. abroad to assist in great Masonic functions in lodges directly under the governance of Grand Lodge, of which there are some 4500 in active working in every quarter of the globe. But I think I can claim to have paid the first purely foreign visit, when, in March, 1924, I went to the United States at the desire of the Grand Master, H. R. H. the Duke of Connaught.

In Canada, Mr. Ramos visited Al-fred E. Webster, Grand Commander, In the three months of my stay, I and in the United States has met tending the session of the Supreme Council. Antonio Arceo, member of the Mexican Supreme Council and prominent engineer, who has been identified with recent Mexican legis-lation affecting engineering and labor problems, accompanied him,

While Mexican Masonry is not taking part in politics as a unit, Mr Ramos said, a majority of its mem-bership, as individuals, probably favors the state as against the church in the controversy there. For the course of a century Masonry has opposed intolerance of all kinds, and has been a dominating force at times in the march of liberalism within the Republic.

As to the position of Freemasonry r knowledge can best be se-by more full, free, and fre-his efforts have been directed to takence, he said, was a regularly ini-tiated Freemason, like many of his coworkers, and since then many presidents of the Republic have bee Masons, including President Calles.

Mr. Ramos explained that he has recently withdrawn the charter of a

standing between the various jurisdictions.

Freemasonry not only under the Grand Lodge of England, but the Grand Lodges of Ireland, Scotland, the United States, Canada, Australia, and New Zealand—and these embrace four-fifths of the Masons of the universe—forbids the introduction of doctrinal or political topics into its assembles, and keeps absolutely aloof from sectarianism and partisanship. It above all insists on a reverential belief in the Eternal, and an inner realization of His revealed will and word. And, believing in both the Fatherhood of God and

These actions could but further widen the breach with England.

Brought About New Body

view of affording to Freemasons in that country the opportunity of inter-course with and recognition by the other regular Masonic bodies throughout the world. Attendance at the lodges of the Grand Orient was

of the Grand Orient in 1803, although it remained on the register of the Grand Lodge of England until 1813. Both lodges practiced the ritual known as the Régime Ecossais Rectifile, the control of which was claimed by the Grand Orient in 1911. The name of God was expunged from this ritual but to La Loge Centre des Amis was given the privilege to conduct its proceedings in the name of God.

In June, 1913, however, the Council of the Grand Orient attempted to

my investigations, and the Atlantic seaboard, Argentina, Uruguay, and Brazil. In these countries, I was faced by a very much more complicated and difficult set of Masonic circumstances than in the United States. In North America, I met only those Freemasons who had inherited in a special degree; and, above all. In June, 1913, however, the Countries, I was face to face with Freemasons who had derived their working and traditions from what is known as Latin Masonry. It was my duty to developed were essential or a more thorough understanding between the various jurisdictions.

ANOTHER CONSUL GOES TO GENEVA

Gibson G. Blake Jr. Sent to Assist Minister to Switzerland

SPECIAL FROM MONITOR BUREAU WASHINGTON-The State Department has announced the apointment of Gibson G. Blake Jr. as an additional consul at Geneva in view of its increasing importance as a diplomatic center. S. Pinckney Tuck, who has been acting as consul, will continue in charge of the consulate, but the greater part of his time will be taken up with duties in connection with the League of Nations.

Hugh R. Gibson, Minister to Switzerland, has taken a ville at Geneva and will spend at least half of his time there because of the duties he is called upon to exercise. The United States is participating

in three international conferences now being held in Geneva. These are the conference for the Abolition of Export and Import Restrictions, at which the United States is repre-sented by Mr. Wilson; the Conference on Communications and Transit, at which Mr. Wilson also is American representative, and the Mixed Committee of Experts for the Study of the Question of Counterfeit Coinage, at which the United States had as representative, W. H. Moran, chief of the secret service of the United States Treasury Department. American representatives attend most of the other important confer-ences as observers.

Mr. Blake, who will augment the staff of the Geneva consulate, is a native of Buffalo, N. Y., and was graduated from Swarthmore College and Harvard. He entered the Foreign Service in 1920.

AUSTRALIA'S BIG NEED DEEMED POPULATION

Wheat Tract of 12,000,000 Acres Idle—Taxes Absorb Fifth of Production

CIAL TO THE CHRISTIAN SCIENCE M PERTH, W. Aust.-C. S. Nathan of the Commonwealth Developmen and Migration Commission, when speaking at the annual banquet of the Commercial Travelers Association, in the presence of a large and epresentative assemblage of legisators and business men, asked two

pertinent questions. These were:
"Can we say we shall be satisfied if
Australia in 23 years' time has a
population of 10,000,000? Could we hold Australia in such circumstances in face of the requirements of neigh-

boring nations?

As a prelude to the consideration of what is undoubtedly a serious position, the former Liberal Premier, Sir James Mitchell, now leader of the Opposition in the Western Australian Assembly, made the observation, by no means fully recognized, that taxation absorbs one-fifth of the total production of the State. In other words, it takes a third of the exwords, it takes a third of the exports of Western Australia to pay taxation. It is, as Sir James Mitchell emphasizes, far too much, and indi-cates that the country is not progressing and producing as it should.

Absolutely Necessary"

What is needed in Western Australia, as in every part of the Commonwealth, is a far greater population.

"Immigration on a proper basis is absolutely necessary," insists Sir James, "and with it an active, definite policy of land settlement and production, eliminating the unemployment difficulty by finding work for everyone." There ought not to be any reluctance in securing migrants when the British and Federal Governments cover losses, provided the crnments cover losses, provided the scheme is reasonably well maintained.

In Sydney recently the Prime Min-ister took the initiative in forming an association to simplify processes and for the elimination of waste. movement has been applied to a large extent to materials and methods, but it seems to Mr. Nathan that it can also be applied to processes of thought, for in the great problem confronting Australia the main difficultive to the processing the main difficultive to the processing the product of the process of the processing the product of the product of the processing the processing the product of the processing culty is to have an appreciation of just what it is the people are after.

cuity is to nave an appreciation just what it is the people are after.

When speaking of production and development people lose sight of the fact that these activities are only a means to an end—the populating of the country for the benefit of the State, the Commonwealth in general and the Empire as a whole. Starting from that basis, which appears to Mr. Nathan to be the correct one, he urges that it can be applied to the question of peopling Australia, at present inhabited by just over 6,406,000 people. According to a simple process of arithmetic, based on the present rate of increase, it will take until 1950 before the population of Australia feaches a paltry 10,000,000. In 23 years going ahead on present lines, there will be a population in Western Australia of slightly over 600,000.

Huge Dairy Industry Predicted

Huge Dairy Industry Predicted Huge Dairy Industry Predicted

Mr. Nathan points out that that is
the problem confronting Australia.
It is with an appreciation of the position that the Commonwealth Development and Migration Commission
has been appointed by the Prime
Minister. Western Australia, perhaps, presents less of a problem—yet
the problem here is difficult enough
—because the State has enormous
areas of unallenated land capable of
development for wheat production.
Investigation has amply demon-

deal of it enjoying 11 and 12 inches annually, all capable of being settled, and producing wheat.

annually, all capable of being settled, and producing wheat.

Mr. Nathan is sure that in years to come there will be in the southwest a huge developed and partially-controlled dairying industry.

"Let us all hope that the question of development will be taken out of the arena of party politics. The tendency seems to be setting in that direction, and soon it is to be hoped the major problem confronting Australia will become the main absorbing task for every public man in ing task for every public man in Australia," concluded Mr. Nathan.

bodied in the park.

Many Interesting Discoveries Made in Volcanology

ECIAL TO THE CHRISTIAN SCIENCE MONIT COPENHAGEN, Den .- Dr. Niels Nielsen, the Danish natural scientis and explorer, has returned to Denmark after a toilsome expedition to unknown parts of the interior of Iceland, on which expedition he was accompanied by P. Hannesson and Sturia Jonsson, the latter a peasant, both Icelanders. Having secured the requisite number

ber of horses, they left the famous Hekla volcano, proceeding into the vast unknown wastes which form the interior of Iceland. Some of the horses had to be left behind, as it was quite impossible to find fodder for the full number. After two days journey they reached a kind of oasis already known to them, where ists, France owes Greece a sum of may obtain hot water free and thus they made their headquarters for can spend an enjoyable and recreation accept the Greek viewpoint, and tive day in the open air at no cost at a northeastern direction. halts at three places, where they

Of special interest were their investigations of the great eruption in these parts in 1913. There are no volcanic mountains, but great

PRINCETON HAS PASSED TEST

Football Team Is Settling Into Stride—Two More Important Games

PRINCETON, N. J., Oct. 29-With he first test of the skill of the Princeton University football team safely sed, an air of relief now pervades the campus, as the eleven settles into

passed, an air of relief now pervades the campus, as the eleven settles into its stride once more on its way to the final contests of the season, the final home game against Ohio State University, and the visit to New Haven to encounter Yale.

It has been an open secret on the campus that the Princeton coach, W. W. Roper '02, regarded the Cornell contest as the real tryout for the team, and the success of the eleven in overcoming the Ithacans on their home field last Saturday, coming from behind after Cornell was leading at 10 to 7, to win by a score of 21 to 10, raised the hopes of their adherents greatly, so that a possible victory over Yale is now regarded as likely.

This week the stars of former years, now alding Roper on the coaching lines, have stepped into the scrimmages as part of the scrub team, and have given the first eleven the finest opposition that it will meet this season, in all probability. Such stars as Jacob W. Blagle '27, Alfred Wittmer Jr. '22, J. Stanley Keck '22, and John J. Winn '19, 'with others yet to come, have faced the team, and the eleven has already profited greatly by the test. Especial interest has been shown in the struggle between the Wittmer Byothers, as E. O. Wittmer '30 is generally regarded as the star of the present team, while his elder brother was in a similar position a few years ago, in addition to winning his letter in several other sports. Strength Is Revealed

It was the Cornell game that really responsible for the rounding into of the eleven. Up to that time, were a number of good players te team, but the united combinathe eleven.

were a number of good period of the combination was frequently absent. But the second period of the Cornell all the doubt as to the strength as line and co-ordination of the sy vanished, and with Wittmer as J. & P. Coats ... Philadelphia ... N. Y. Nationals ... Philadelphia ... Ph

ck, and J. C. Norman, at half, the

leaders.
Practically all the positions on the eleven are now settled, and the lineup for the two remaining big games
can be depended on. In case of forced
changes, there is plenty of good material to fill in, as has been proved by
the skill of the substitutes used
against Washington and Jefferson and
Cornell.

Captain Plays Right End

Cornell.

Captain Plays Right End

The end places will-find Capt. C. R.
Moeser '28 on the right, with N. W.
Lawler '29 at the other side, while M.
N. Morrison '29, C. P. Benedict '29, J.
S. Janney '30, and D. W. Taylor '29
have also seen service in the 'earlier games. Besides these, J. W. Stinson '29
and W. M. Gottschalk '29 are listed for the end places.

Two sophomores, making their first appearance in varsity competition this fall, have displayed such brilliancy in tackle play that they have lifted themselves into the leadoff places.
They are Whyte at left tackle and J. M. French '29, one of the stars of a J. W. Lewis '28 and J. M. French '29, one of the stars of a year ago, have been pushed back into substitute places, with another '30 classman, W. A. Moore, disputing even second place with them. N. W. Wasner '30 and B. B. Odell '29 are still further down the list, ready to fill in if needed.

J. M. Caldwell '29, at left guard, and

Many Combinations

It is in the backfield, as in the case of so many other Princeton championship teams, that the real strength of the team lies. Any one of a dozen combinations, though the first trio stand out best, can be organized from the wealth of material which has been developed. At present, Baruch, quarter, Wittmer, Norman, in left and right halfback positions respectively, and Miles, fullback, are the leadoff men. Owen, at half and full, with Norman moving back to fullback on occasion, help to compose other layouts, and Lowry is also a distinct asset, especially in forward passing work. Scarlett, D. C. Vogt '30, Graham Jones '29, J. H. Maroney '30, H. C. Disston '28, the only senlor in the

peen developed. At present, Bartien, quarter, Wittmer, Norman, in left and right halfback positions respectively, and Miles, fullback, are the leadoff men. Owen, at half and full, with Norman moving back to fullback on occasion, help to compose other layouts, and Lowry is also a distinct asset, especially in forward passing work. Scarlett, D. C. Vogt '30, Graham Jones '29, J. H. Maroney '30, H. C. Disston '28, the only senior in the backfield list, and J. W. Cooke '30 are listed as halves, while J. R. Recquart Jr. '29 and P. H. Strubing '29 are the substitutes for Baruch at quarter. No great opposition is expected from William and Mary College this weekend, but the visit of Ohio State University the following week may bring out high-class football. The visitors are not tip to their previous records so far, but Dr. John W. Wilce, their coach, has recently stated that the slump is about over, and they may be far better when they come here. Then the great goal of the season the great goal of the season the great goal of the season the final aim of a team that only needs such an aim accomplished to be ranked with the famous teams of the CREEGAN SWIMS 50HRS. 6M. backfield list, and J. (N. J.), Y. M. C. A., completed his 150mile swim from Albany to New York,
yesterday when he arrived at the Battery at 4:18 p. m. Creegan's time was
50hrs. 6m. The 18-year-old Zitenfield
twins. Berenice and Phyllis, of New
York, swam from Altany to New York,
in 52h. 30m., last June. Their time was
4h. 41m. better than the previous mark
established by Mrs. Lottle Schoemmel.
The course of these three swimmers was
162½ miles.

BROWN TO PLAY HOCKEY

BROWN TO PLAY HOURE 1
SPECIAL TO THE CHRISTIAN SCIENCE MONITOR
PROVIDENCE, R. I., Oct. 29—Brown
University announced yesterday that both
the varsity and freshman would be represented by ice hockey teams this coming season. The teams will practice and
play in the Providence Auditorium. Jean
Dubuc, manager of the Providence hockey
team in the Canadian-American Hockey
League, will coach the players.

Swimming and Tennis Teams in 1929

EUGENE, Ore.-E. F. Abercrombie, University of Oregon, has started several outstanding stars in the two sports to Hawaii and Japan in the

islands of Hawaii and also in Japan. Athletic clubs and university teams will form the competition.

Five or six outstanding tennis players of the 1929 spring and a like number of swimmers of the winter season will be chosen to make the trip. Plans call for the party to leave via San Francisco early in June and after touring the Islands and Japan they will return via Seattle. Wash., arriving here in time for the opening of college in September.

Personnel Doubtful

winter will have several candidates, including J. J. Anderson '30, star freshman back-stroke and distance swimmer who set a new Pacific Coast Conference record in the 150-yard back-stroke event last winter while in freshman competition. This record does not count as a new record, however, as it was not made in a varsity meet. Others include W. W. Fletcher '29, D. H. Kier '29, R. W. McAlpin '30, C. R. Floyd '31, D. C. Neer '31, Charles Silverman '30, H. H. Hatton '30 and W. K. Gillette '31. The tennis prospects at present intended w. W. K. Gillette '31. The tennis prospects at present in facing Yale today for the New Hampshire eleven has played Yale 10 times and, the best it had succeeded in accomplishing had been at ie, which came in 1924. The Big Green had been held scoreless on eight of these occasions. The United States Naval Academy, with a record of only two wins out of 11 meetings and one a tie with University of Pennsylvania, hoped to make it three wins today. The Midshipmen have a powerful team and Penn had lost its last two games.

portant pieces, including queens, had been exchanged

Because of the forward pass he threw which helped to score the winning touchdown for University of Illinois against Northwestern University last Saturday, D. T. Steussy '29 was being drilled this week as first-string quarterback in the hope that his tosses will work as well against University of Michigan.

After the third week of play University

score.

The halfway mark has been passed in the "Big Ten." with each of the members having played four games, and yet no field goals have been scored. This is believed to be due to the difficulty of reaching the goal posts, which are 10 yards farther away this year, being set back from the goal line to the end line No field goals have been scored in the Missouri Valley Conference either.

Vale varsity followers may at times.

Missouri Valley Conference either. Yale varsity followers may at times during, the past few years have been disturbed and disappointed with the showing of the Eli on important occasions; but the Blue is always powerful enough to cause invaders much doubt. Dartmouth, with one of its best teams, will visit the Yale Bowl tomorrow, but without any assurance of victory against the Eli. The Yale Alumni Weekly carries an article about returning to the unpaid coaching system of former days. Head Coach T. A. D. Jones retires at the conclusion of this season and all manner of ideas are due to be expressed shortly.

After the third week of play University of Utah and Colorado College still hold the top place in the Rocky Mountain Conference.

tain Conference.

An old oaken bucket, iron bound, has been donated by a Grinnell College graduate as a perpetual trophy for the winner of the annual game between Drake University and Grinnell. Drake carried it home last Saturday with a 26-to-6 score.

SPARROW MADE CAPTAIN SPARROW MADE CAPTAIN
WINNIPEG, Man., Oct. 29 (P)—Emory
Sparrow, member of last year's Calgary
Tigers, has been named captain of the
Minneapolis hockey team in the American Hockey Association for this season, according to announcement last
night by J. Lloyd Turner, manager, who
is here arranging for accommodations
for his squad during preliminary work.

HALSELL LEADS SENIORS TARRYTOWN, N. Y. Oct. 29—Hugh Halsell of Sleepy Hollow Country Club, led a small field of seniors in winning the low gross prize with a total of 160 strokes in the 38-hole medal play for the first annual Westchester senior champlonship, played here yesterday over the links of the Rockwood Hall Country Club.

COLLEGE GOLF RESULTS

OREGON COACH LOOKING AHEAD

negotiations for a trip which will take

summer of 1929.

Coach Abercrombie plans a schedule which will show his picked tennis and swimming teams in action on various islands of Hawaii and also in Japan. Athletic clubs and university.

The personnel of the team is doubtful at present although several players and swimmers loom as possible members. The swimming team this winter will have several candidates, including J. J. Anderson '30, star freshman back-stroke and distance swimmer who set a new Pacific Coast

to the grandstand. Last year he thought they were a little over-excited and tense just before the opening game, so to rolax them a little he marched them out on the field, faced them toward the stand, and led them in a Chicago song. Some jiles about the Maroon 'Canaries may have bothered the boys in later games, because they lost all their 'Big Ten' contests. This season they have won two Conference games and one other, and they are not singing.

Possibilities of the lateral pass as a scoring play were shown by University of Chicago with its second touchdown against University of Pennsylvania. The Maroons had plunged for three downs within the Penn five-yard line without gaining more than a yard or two. Remembering the Chicago teams of previous years which plunged and plunged on touthdown, the Penn line and backfield and nothing else but, touchdown or not touchdown, the Penn line and backfield was massed for another Maroon plunged on fourth down. What looked line and the receiver ran wide over the goal line without being touched.

Coaches have a difficult time making plunger sured into a lateral pass, and the receiver ran wide over the goal line without being touched.

Coaches have a difficult time making plurgers use what they have been taught when they' come to the needed oxasions. They will execute fundamentals, as well as the most involved trick plays, to perfection in the early, easier games. Then they tend to disintegrate, specially as to technique on fundamentals of tackling, blocking, punting, punt catching, passing and pass receiving. The longer the season the harder it is to keep them up to standing in these matters.

Another thing that bothers coaches is to see a play used for a surprising rain and they visited away target away there are a surprising rain and they visited away there are a surprising rain and they visited away there are a surprising rain and they visited away the party of the party and the receiver ran wide over the goal line without being touched.

The proposed the proposed to the pa

The Disbandment of Skating Union Practically Certain

Planning Long Trip for the Delegates at Meeting Expected to Vote in Favor of Dissolution-New National Organizations Will Probably Be Formed

America which combines the United States and Canadian skating associations and the formation of two separate national organizations, one for the United States and one for Canada are the important matters to come before the inneteenth annual meeting of slating delegates of the two countries at the Hotel Statler, Nov. 14.

"It has been found necessary," states William C. Hill, president of the International Skating Union, "for the protection of United States interests in skating, that the country should have a national skating body so that it may have membership and representation on the boards of the International Skating Union of Europe, and the Olympic Committee, which recognizes only national organizations.

"The Amateur Athletic Union of the United States and the American Olympic Committee have expressed themple of the International States and the American Olympic team of skaters, who will be the first time that the annual meeting of the organization has been held in Boston. Therefore, a big entertalment is planned for the delegates on the day preceding the meeting which convenes at 10 o'clock in the morning. pic Committee have expressed them-selves heartily in favor of the forma-tion of a national skating organiza-tion. The situation involves disbanding the present International Union which has 10 United States members and three Canadian representatives. This would allow the Canadian groups to form a national organization of their

form a national organization of their own.

"We have prepared during the past few months articles of alliance to be signed between the two organizations when formed which call for international meets between the two countries. They will be run the same as usual, only the competition should be keener and each country will have its own representatives to send to the Olympics without controversy. In the past it has been a half-way proposition, for in cases where an American and a Canadian tied for honors, the discussion arose as to which should be sent. The situation has been altogether delicate all around."

Difficulties Arise

The difficulties arising, which have

The difficulties arising, which have caused Canadian clubs to propose a separate national organization, have been many. The American associations represented in the Skating Union are believed to be heartily in favor of the separation of the two national factions which will probably be completed at the meeting. Montreal, the parent skating organization in Canada known race against the clock so why should retrieve the trackmen do not skating organization in Canada known race against the clock so why should which will probably be completed at the meeting. Montreal, the parent test this system. The trackmen do not skating organization in Canada, known as the Frontenac Skating Association, was the newest organization to enter to such methods. They make their best time when furnished actual competition. I also think that actual competition in the skating races makes them.

Johns, N. B., and Quebec.

Another matter of importance that will come before the 50 or more delegates expected to assemble is the sending of two men to the Olympics next year, as representatives of the United States Skating Union, if formed, in speed skating. The decision has already been made by the United States

delegates on the day preceding the meeting which convenes at 10 o'clock in the morning. Olympic Meeting, Nov. 2

The meeting of the American Olymple Executive Committee to arrange plans for the winter sports teams of the country, will be held Nov. 2 at the New York Athletic Club, New York City, according to President Hill, who just received a telegram to that effect. As President Hill will be unable to attend the meeting he will send Harry F. Noar of New York, secretary of the Middle Atlantic Skating Association, in his stead, as his special rep-

was the Frontenac Skating Association, was the newest organization to enter the International Union of North America; but the Canadians sent and requested membership in the International Skating Union of Europe as an independent organization under the Amateur Athletic Union of Canada. This caused difficulty because the United States was without representation in the International Union of Europe and could not vote on Olympic questions, while Canada, part of the North American organization, had votes in both unions. The two other Canadian members represented in the North American organization are St. Johns, N. B., and Quebec.

Another matter of importance that will come before the 50 or more delegates expected to assemble is the sending of two men for the Olympics scatters of the country will be on hand and it is expected that the leading speed skaters will also be there. The services of all the Olympic stars of the country in figure skating and speed skating are being solicited with the probability that all will be secured. AMERICA NEEDS TRADING SHIPS, SAYS NAVY CHIEF

Secretary Wilbur Declares the Present Policy Is

WASHINGTON—A plea for sup-port of the American Merchant Ma-rine was made by Curtis D. Wilbur, Secretary of the Nevy, in a Navy

an essential in our commercial elopment and a necessity to adete naval defense, an element ch is largely, if not wholly, self-porting, and for that reason, if no other, to be heartily supported the devergment and our neonle-

the Government and our people.
"Our increasing foreign trade
makes the question of an Americanwaved merchant marine of growing nce." Secretary Wilbur de-"The transportation of our commerce in foreign ships places our commerce in foreign salps places our commerce more or less at the mercy of the foreign carrier. The freight paid by Americans for the transportation of overseas commerce amounts to about \$600,000,000 per annum and not only helps to support a foreign merchant marine, but indirectly helps to support foreign navies maintained to support that marine and the nation owning it:

curity of the nation, the merchant arine would not only supply per-unel but vessels to be used as

"Not Good Business"

In an address at George Washington University, Capt. Dudley Knox, U. S. N., retired, declared: "Unless we have American merchant ships in

we have American merchant ships in numbers commensurate with our rade, we are constantly subject to he risk of upsetting the whole economic fabric of the Nation.

"This risk has two aspects: First, oreign merchant ships may be districted in large numbers from American trade, as has been done in the ast, for purposes incidental to forign wars. Second, to have our trade arried by the ships of our competions is not good business, because the ships of discrimination harmful to American interests fill creep into the vital transportation link between the ultimate marter and our factories, farms and

mount of horsapower now released

of installing the improved devices, is PUBLIC IS URGED

According to C. G. Gilbert and J. E. Pogue, two engineers who have studied the question of American power resources, the Ford case cited above, opens up a new vista.

"It is not beyond the bounds of reason" they say "to foresee a condition whereby a householder in the place of his ton of anthracite which he now welcomes at \$11 (and at some places much more than that) will receive a ton of smokeless fuel without slate, a month's supply of cooking gas, 40 miles of motor fuel, enough fertilizer to start a small garden and tar sufficient to lay the dust in front of his house—all for far less money than he now pays for inferior coal. This may appear a fanciful picture, but coal has precisely this possibility within itself."

This picture is not likely to become a reality until the present overproduction of coal and disorganization of the market is eliminated. Present conditions put a premium on rapid

making deliveries to consumers from the nearest mine.

The right to levy a tax upon our goods during the trip across the water, in form of freight rates, is a power that we would not willingly yield to any foreign nation or foreign.

"The carrying of our products in foreign-built and foreign-owned ships is not only objectionable because it provides a method by which foreigners may levy an arbitrary tax labor.

"The annual of overseas commerce and making deliveries to consumers from the nearest mine.

With the end of war control, these savings collapsed. In 1921, for instance, the Geological Survey, described a great amount of uneconomic haulage. Harlem County (Kentucky) lump coal was moving into western Kentucky, Indiana, Illinois and Ohio, passing mines in each of these states that were producing coal of identical quality. Equal grades of coal are moved from Illinois mines, to be sold in Ohio, and from Ohio mines to be sold in 1llinois.

As a method of meeting this situation a proposal has been advanced by James J. Davis, Secretary of Labor.

cause it provides a method by which foreigners may levy an arbitrary tax upon our commerce by way of freight rates, but is also objectionable because there is no oligation on the part of such carriers to carry our freight or to maintain lines of communication best adapted for the carrying of our overseas commerce. Cecretary Wibur pointed out that the World War had emphasized the importance of the merchant marine. The Navy, he said, was interested in the merchant marine, not only because of its commercial value, but also in a major war involving the security of the nation, the merchant Miss Adams Describes Students.

Miss Adams Describes Students at Constantinople

"We try to show them that there is still friendliness and unselfishness in the world," said Miss Kathryn N. Adams, president of the Constantinople Women's College, in describing to Radcliffe College students the work that is being done by her institutes. tution among the 19 nationalities represented on its campus. It is little wonder, she said, that the wars and enmittees of the Near East, in which so many times everything has been swept away, have left them "threatened with the most profound pessimism."

"I wish I could take you with me and make you see our girls as I can see them," Miss Adams said. "Their clothes are much the same as yours and they are interested in their sports. Their enthusiasm is even more keen than yours. If I may use the phrase, they are more 'un-blase' than you are about their college life. For it means to them an opening out of opportunities and the acquisition of the breadth of vision which char-

of opportunities and the acquisition of the breadth of vision which characterizes the American college girl."

"We are not trying to Americanize our girls," Miss Adams went on, "we want them to feel that their life work is in their own country. Will you not sometimes think of the girl in the Constantinople College who is looking for you in America for high ideals, for culture and scholarship, and who, in an increasing understanding and co-operation with the girls of other nationalities with whom she associates in helping on that time when we will not be divided by distinctions of class and nationality, but will be members of one big family working and striving for the same end?"

TO FULLER USE OF RADIO GAINS

Out-of-Date Sets Held Responsible for Complaints -New Devices Ignored

SPECIAL FROM MONITOR BUREAU WASHINGTON-Obsolete radio receivers now in general use over America, as revealed by estimates in the Philadelphia area given before the Federal Radio Commission, are blamed for dissatisfaction of listeners-in, and are charged with holding up the development of the whole in-

one of its most serious difficulties.

Philadelphia radiocasting stations serve about 4,000,000 people possessing about 500,000 receiving sets, it is stated. According to estimates of spokesmen at the commission's hearing, between Station WBAQ and WCAU of Philadelphia, each asking for 1150 wavelength, about half of the sets in use about Philadelphia are of good quality, 40 per cent of the rest are of inferior grade, while the remainder, or 10 per cent, are classed as obsolete.

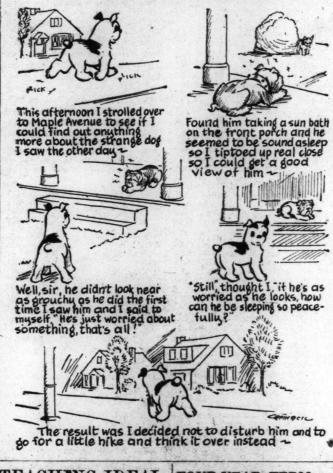

This means that in a typical city like Philadelphia, 250,000 sets are of superior or good quality, 200,000 sets are moderate or inferior, while 50,000 obsolete sets are incapable of tuning in on low waves or of giving any but crude tones.

given to the subject of conservation. Another great wastage in the coal fields, growing out of the disorganized state of the industry, is in coal distribution after extraction. Coal provides the classic example of what is known in railroading as cross-hauling. During the war the Fuel Administration saved 160,000,000 carmiles by "zoning" coal, that is, by making deliveries to consumers from the nearest mine.

With the end of war control, these savings collapsed. In 1921, for instance, this Good crops have put them back on the subject of conservation. Most buyers of giving any but crude tones.

In all large urban areas, it is explained, enterprising merchants buy at wholesale prices low cost obsolete sets to clear the way for new types. The chief disadvance of well being. Latest fight years, according to figures gathered by the Department of Agriculture and announced by William M. Jardine. While Congress has been discussing legislative means of assisting the farmers the economic good crops have put them back on wantage is to the ultimate consumer.

Gain in Index Figures

The index of the purchasing power of farm products in terms of nonagricultural products has jumped from 88 in August to 92 in September. The index figure for September, 1920, was 79; in 1921, 75; in 1922, 66; in 1923, 79; in 1924, 83; in 1925, 88 and in 1926, 83.

Federal figures also show the cost wife today as compared with 1890, and years between. The figures are gathered by the bureau of statistics of the Labor Department. Prices for these years are listed for round steak, three kinds of pork, hens, milk, butter, lard, eggs, flour, corn meal, potatoes and sugar, and the housewife is able to trace the progress of prices. In 1890, for instance, she could buy 8.1 pounds of round steak for a dollar. In other words it cost about 121/2 cents a pound. Those days apparently are gone forever. In 1926 she could buy only 2.8 pounds of round steak for a dollar. The average price per pound was 35 or 36 cents.

Comparison of Prices The prices of pork also have soared. In 1890 the housewife could buy 9.3 pounds of pork chops for a dollar while in 1926 she could get only 2.5 pounds. In other words, and taking into account price of ham, bacon and lard, a dollar today is worth only about as much as 30 cents in 1890. A curious fact is that a housewife could buy more ham or pork chops with a dollar in either of the war years when the nation was told "food will win the war" than she

can with the same money now.

In 1890 a dollar would bring in 14.7 In 1890 a dollar would bring in 14.7 quarts of milk. In 1926 it would bring but a trifle over 7 quarts. In 1890 the housewife could buy 34.5 pounds of flour for a dollar. In 1926 she could buy only 16.7 pounds. In 1890 a dollar would buy 14.5 pounds of sugar—and in 1926 it would buy exactly the same.

More About Old Sheffield Plate

THE years during which old Sheffield plate was an important factor in home decoration covered that notable period when English furniture design and construction reached their highest levels. Thomas Boulsover discovered the method of making this fused plate in 1743, the process being described on this page last Saturday.

Thomas Chippendale was in 1743 a little known cabinetmaker of Worcestershire, who was to come to London within the next five years. While Boulsover was applying his invention to the making of buttons and small boxes, apparently never

and was turned out in factories on a quantity basis.

Edges and Shields of Silver

Where the edges of the silver-coated copper met and made sharp corners, the red metal was likely to show and to mar seriously the looks that these rulers had passed on? The Commonwealth ceased in 1660. James II's reign ended in 1688, Queen Where the edges of the silverof the piece. To avoid this, and to give better wearing quality to any exposed angle, all-silver edges were often carefully soldered to certain

portions.

These edges were formed in the same way round wire is, by drawing the metal through a steel block having in it a hole that is the shape of the finished. desired cross-section of the finished strip. Thus thin ribbons of silver, flat, half round, a hollow U, a sharp L, or forms including several curves and angles, were produced and used to enrich the beauty and increase the durability of the ware.

To gain still more closely the ap-

pearance of sterling silver by carry-ing engraved crests or family initials. it was necessary to have a much thicker body of the finer metal in certain places on the bodies of some articles. This was accomplished in one of two ways, either "sweating" a thin circle or oval "shield" to the

Rectangular Base Flat Candle-stick With Chased and Mounted Rim and Thumbpiece. The Hole the Lower Part of the Up

piece where the engraving was to be and smoothing the edges till they disappeared, or by cutting a hole through the plate and filling it per-fectly with a sheet of silver.

In the latter case an examination of the inner side of a hollow dish is likely to show where the solid silver was set in. The presence of one of these much-desired shields may be detected from the outside of the piece by breathing on the place where it is likely to be found. If there it will clearly appear in a lighter color than the surrounding

As the wealth of the country was more and more widely distributed, the utilitarian arts as expressed in home furnishings including tablehome furnishings including table-ware were increasingly encouraged. Families of moderate means were able to gratify in a growing degree their desires for beautifying their homes. Costing far less than the fine silver which it duplicated in appearance, the new fused plate offered a happy contrast to the sober gray pewter that had been so far the nearest approach to the finer metal, and its popularity was widespread and its popularity was widespread and lively.

The Influences in Design

The designs for the contents of the home of wealth, as well as those for the building itself, originated more generally than we may appre-clate with the architects. The broth-ers Adam, of whom Robert was the more famous, were employed by many rich patrons as architects and as interior decorators, though the latter term was then unknown. As their rooms required harmonious

By CARL GREENLEAF BEEDE

While Boulsover was applying his invention to the making of buttons and small boxes, apparently never dreaming of its possibilities for tableware, the master designer, carver and cabinetmaker established himself in London as a cratical business man.

This new material, silver fused to a sheet of copper, was applied slowly at first, then widely, until its use included almost everything that had been made of silver. By 1770 it had become an important product of the cities of Sheffield and Birmingham, and was turned out in factories on a

receive much notice, or was it much made. How then can the designation Cromwellian, or James, or Queen

Anne's reign ended in 1714, 30 years

covered.

This is explained by assuming that workers in silver plate copied on re-quest pieces of old silver which ac-tually had been made in these earlier periods. To say that such product, although made in the late 1700's is in the style of a certain much earlier period is wholly proper. A wrong impression may be gained, however, if the words "in the style of" are

But little old Sheffield plate was made before George III became King in 1760, and the best of it appeared during his reign, which ended in 1820. After that, in the time of George IV, the decadent Empire tastes prevailed and the grotesque was often preferred rather than the artistic. So "early" or compared the solution of the readily marketable new ware, some English, was told to explain how the mishap had come about. Instead of being angry or reproachful for having been caused such anxiety, even if unintentionally, the mother, through her countryman, thanked them for bringing back her son, and of the readily marketable new ware. Some English, was told to explain how the mishap had come about. Instead of being angry or reproachful for having been caused such anxiety, even if unintentionally, the mother, of rigid, incomprehensible etiquette than the artistic. So "early" or "late" Georgian, as a time of making, of mahogany in furniture; the ar-

venture.

Several years later when back again in America they had a visit from an interesting Japanese. He spoke English fluently and was an authority on antique ceramics. Noticing that his glance had fallen more than once on the bowl which occupied its usual place on a table near where he sat, the hostess laughingly said that it was on exhibition not on account of any in-trinsic worth, but because of a story.

After the recital of the latter, the guest with a murmured "Pardon," took the piece in both hands and studied it silently. Then he said: "Strange! This is Bizen-yakt. Very old."

As the foreign words conveyed nothing to them he went on, saying that "yaki" meant anything baked, hence was used to designate ware, and that Bizen was the province whence this sort came. Produced first in the fourteenth century, the output was not artistic until late in the sixteenth when by official order, utensils for the social clubs began

Over 300 Years Old

This bowl had evidently been made about that time, its translucent glaze being a feature of the then new prodbeing a feature of the then new products It's oddly metallic ring, and the hardness of the body were results of the long stoving (three weeks and more) which it underwent. About the year 1650, the character of the ware was changed to a slate colored faience, some samples of which were embellished with exquisitely modeled figures. These were very scarce and commanded high prices. The Bizen-yaki familiar to western collectors was a cruder variety, as a rule.

Veritable Savery cult.

In the course of his research work, Samuel W. Woodhouse Jr. of the museum's curatorial staff, has discovered two chairs of maple bearing a label similar to that in the Van Courtlandt lowboy. A walnut arm-chair, also, harbored half a label.

Vines and Their Trellises for the Sunroom Garden

THE natural place for plants to grow is out of doors, where blue sky spaces and golden sunbeams enhance the tender delicate greenery of foliage, the brilliant colorings of bud and flower.

The art of originating house conditions in which plants appear natural is a necessary one to master if charm and effectiveness are to be achieved with growing things indoors. Thus the sunroom is the ideal situation for the indoor garden. Lacking a sunroom the largest lightest window should be chosen. Not only must be considered the needs of the plants as to sunshine and unhampered spaces but a background should be provided which suggests nature.

Because of its intimate tendencies,

Because of its intimate tendencies, the sunroom garden will demand more care and distinctive touches judiciously applied than does the rambling outdoor garden. A discriminating choice of vines, and discreting the continuous continu creet usage of attractive trellises, a sunny window! measurably to its charm.

placement, too, is an im-consideration. Usually a vine-covered trellis set down among pots of low-growing begonias and drooping ferns, with possibly a hanging basket at a discreet height to balance the arrangement, lends contrasting effects which relieve monotony. An arched trellis, if not too low, set at one end of the sunroom among potted plants and a basket, lends the pleasing suggestion of bloom-laden vistas beyond. vine-covered trellis set down among of bloom-laden vistas beyond.

Vinelike Plants Plants, too, that possess sprawly, vinelike habits are delightful grow-

The fuchsia is a beautiful plant of this type. Anybody familiar with the fuchsia can visualize the charm of it in company with a suitable trellis. Its foliage is very ornamental, the green leaves showing red veins at the base. The varying colors and unique form of its flower are exquisite. The calyx and corolla of one flower will be almost uniform, possibly all dark nymbox possible. bly all dark purple or purple shading to mauve; another will have pale carmine sepals and a deep scarlet corolla; and still another will have a calyx of cochineal-red and a corolla of deepest violet.

A charming support for a fuchsia is illustrated in the drawing of the woven flower basket. Dowel sticks of suitable length are wrapped and fastened together at joinings with raffia, reed or paper rope, in keeping with the material of which the box may be woven, and arranged in trellislike effect. The lower ends of the main supports are thrust se-curely into the weaving of the bas-ket. As a friendly companion, a woven hanging basket recalling the

Trellis Forms Designing and constructing trellises that conform to the size of the small vines and accent their color rangement of the trellis, which is part of the background, is also slender. If the plant be chubby, as is the fuchsia, it takes a corresponding style of trellis to stress its characteristic beauty. The arched trellis is generally higher than it is wide if it is to adapt itself to delicate when

vines.

It is a simple matter to make attractive trellises for indoor use.

Trellis strips and rails are the foundation materials. The individual can copy the designs of the large trellises she may see in garden or store, reducing the size to the proper scale, or she can design original ones and. or she can design original ones and build them accordingly. An arched or circular effect is achieved by bending a trellis strip which has been steamed to make it pliable. Any woodworking shop has facilities

for this purpose.

An important thing to remember about nails for trellis building is that headless ones are best, for they will not show when paint is applied. The

THERE are many ways in which

the life of cut flowers can be lengthened very considerably-a Plant one bulb in a six-inch pot of good garden soil and leaf mold. the proportions being two-thirds soil and one-third mold. A little sand can be mixed in. Barely cover the neck of the bulb and keep it rather dry until it begins to sprout, then water it regularly but not in excess. Keep it in a temperature of 50 to 55 and stirred. Instead of beginning to wilt in three or four days or less, the the stems are well started, then per-mit it to grow in a light, sunny win-flowers, if in good condition when bought, will last for 10 days or a fortnight. The requisite amount of fresh water should be added daily, trusses of the hyacinth, made up as and every third day a complete new they are of hundreds of tiny florets supply of carbonated water. If in blue, white, rose, pink, lavender and purple? They are easy to deal with, and if one will get the best quality, large, smooth-skinned, firm into hot—not boiling—water for 10 into hot-not boiling-water for 10 minutes. The effect is really wonder-

Plant in "half-pots" that have been ful. The flowers can then be trans-soaked in water at least 12 hours to remove any deleterious substance. If flowers sent by post arrive remove any deleterious substance and follow the same general methods as were described for freesias. A more appropriate method to foldrooping, they will usually revive if entirely immersed in water for an hour, and then set to stand in a low in forcing the single hyacinth is to grow it in a special hyacinth glass and water. The bulb rests on and add not more than three drops of glass and water.

a cuplike receptacle at the top of the glass which holds it above the water, the glass being filled with water to within one inch of the bulb water to within one inch of the bulb added, would always arrive fresh if the stalks were inserted in little

Many people cannot understand why, although they never fail to keep water, place the bulb in its cup and set the glass in a cool, dark place. Replenish the water whenever necReplenish the water whenever nechanged in the state of the state o only absorb a certain amount of water, but extract the "nourishment from the rest. Thus a full vase may be practically useless water so far as the flowers are concerned. The obvious course is to renew all the

water at least every other day.
Some stalks, when cut, seal themselves. Apart from woody stalks, such as those of chrysanthemums, this closing or sealing process may be undone if the stalk ends are deliberately bruised by a tap or so with a small hammer. The water can then mount into the stalk. Flowers thus treated, and put in car-bonated water, have lasted for five weeks. Many cut flowers, by the way, are suffocated by not being removed when a room is being swept. The coating of dust prevents them, lit-erally, from breathing.

Music News of the World

Vienna's "Coolidge Concerts"

Foundation.

Interesting would be statistics of how many musical pens Mrs. Coolidge and her prizes have set into motion. More interesting still, after a first hearing of, say, Leo Weiner's prize Quartet, a scrutiny of the other works submitted. But quite apart works submitted. But quite apart from speculation as to the results of the annual contest, there remains no doubt as to the stimulating effect which this American woman has upon the composers of our age. Some doubt and uncertainty prevailed here at first as to the nature and object of the enterprise known as the "Coolidge concerts." But with recollections of the Esterhazys and Rasumofskys still lingering, the Viennese finally agreed that the Coolidge patronage was an instance of "history" ronage was an instance of "history repeating itself," recalling memories of the rococo and Biedermeier age.
And only one question then remained to be answered: whether or not a new Hadyn or Beethoven would be heard in the two concerts.

Bridge's New Quartet Whatever the answer may be, the two programs surely acquainted the Vienna public with a number of composers whose works, even whose names, had heretofore been com-pletely unknown in Central Europe -Frank Bridge, for instance, or Charles Martin Loefiler, or Frederick

Frank Bridge's Quartet No. 3, open-Frank Bridge's Quartet No. 3, opening the programs, expressed a certain aspect of contemporary Englich music generally regarded with som misgivings by the older and conservative groups of central Europe The Teutonic mentality, strongly bent on "systematic," "organic" evolution, is wont to search for the bent on "systematic," "organic evolution, is wont to search for the "missing link" between the great classic musical tradition of the England of, say, Sir Edward Elgar, whom Germany has come to regard as the Brahms of British music, and the younger generation of Bax, Bliss, is or Lord Berners. Bridge is, as far as memory serves, totally new to central Europe, and Vienna was therefore unable to verify the verdict therefore unable to verify the verdict of his countrymen that this new quartet represents him at his best. But even apart from relative standards, the Quartet No. 3 is a piece of excellent workmanship, with pregnant and well developed themes—too melancholy, too "minor" in mood, however, always to evade monotony. Bridge's work was, in this respect and on this occasion, the antipode of Malipiero's Sonata a Tre, for cello and piano. The second movement,

Malipiero's Sonata a Tre, for cento and piano. The second movement, not played here, combines the violin and pianoforte, and all three instruments unite for peaceful collaboration in the last movement. Quite unlike Bridge's piece, it is brisk, brilliant music, unburdened by speculative tendencies, calculated to please and to give full sway to the two instrumentalists. An opportunity, incidentally, enthusiastically embraced here by Emma Lübbecke-Job and Hans Kindler, who reveled in the

coped with the orchestral waves set motion by the composer and by Hans Kindler, the conductor; and succeeded not only in making herself heard—a triumph in itself—but in showing a beautiful voice as well. Leo Weiner's "Pittsfield" Quartet, new here if not elsewhere, is fluid, pleasing music of the mildly entering music entering music of the mildly entering music entering music entering music entering music entering music entering music entering mus

when I acquired for my own library every modern song of unusual merit every modern song of unusual merit as soon as it was published. I got a great quantity of modern works together, which I still possess. But I will not insist upon the musical value of every item, after the lapse of the familiar Respighian note:

"La Nascita di Vere." Limpid, transparently scored and sonorous music of the familiar Respighian note:

"Gregorian elements wedded to impressionistic influences and, this time, to certain Puccinian reminiscences as well. The "Trittico" was me, to certain Puccinian reminis-nces as well. The "Trittico" was clearly the popular success of the Coolidge concerts. Schönberg's New Quartet

Their great artistic event, however, was the first performance anywhere of Arnold Schönberg's new Quartet, No. 3, Op. 30. To speak of any work by this master, and of this one in particular, with any amount of certainty after a first and single hearing taxes the critic's sense of responsibility. One question was above all to be answered by the new Quartet: is the new Schönberg work again what misunderstanding or biased observers had called the Quintet for woodwind: "paper music," "musical mathematics"? To refute, even to quote such verdicts is distressing to Their great artistic event, however,

interval of a third. Such critics may, of course, look in vain for "pregnant themes" also in Schönberg's new Quartet.

To answer the aforesaid question: the Quartet is again in the "twelvetone technique." But, if the Woodwind Quintet was perhaps an experiment in the new technique, a study, as it were, in a new musical grammar—the Quartet, two or three years younger, is a well set poem in the new language. The lyric beauty of the second movement, the virile force of the final Rondo are intelligible even at first hearing. And Vienna, Oct. 6

AT LAST Vienna has made the acquaintance of that untiring pioneer and generous supporter of contemporary music, Mrs. Elusabeth S. Coolidge. For the first time Mrs. Coolidge has included Vienna and other central Eurepean cities in the itinerary of her campaign for modern music. The Viennese knowledge of her activities had been vague. Only the initiated, chiefly the young musicians, were more definitely informed of the details of the Pittsfield Festival and the Coolidge Foundation.

Discreption:

Note that the Schönberg, if errors there be, are more important, more there was perhaps an experiment in the new technique. But, if the Wood wind Quintet was perhaps an experiment in the new technique, a study and the receive and fundamental for the future of music than the "positive achievements" of the seekers for popularity. As for the frequent complaints of "lacking pregnant themes," Schönberg index himself surely in good company in this respect. Whoever all, there is a lucidity of the seekers for popularity of the second movement, the virile force of the final Rondo are intelligible even at first hearing. And above all, there is a lucidity of themself work, a supreme, clarified craftsmanship, that stamp Schönberg which is fifth Symphony—on a simple of our age.

MARTHA ATTWOOD

A Recitalist's Viewpoint

By WINTHROP P. TRYON

many productions. For, "every piece we particularly associate with I present," declared she, "is a series French art."

of dramatic scenes in the small. Miss Attwood remarked that very When I interpret a song, I must ac-complish precisely what a company of artists do when they give an opera. I must enlarge the concert hall to a theater, I must make a monitor took notice of her and commedded her singing. Many beginnew minutes have the illusion of a
complete evening, and I must cause
a few pages of music to seem a few pages of music to seem as a whole book of arias, interludes and choruses. In addition to that, I must picture places, indicate action and characterize persons. No painted canvas or shifting lights to set me

my study with the accompanist and my labor of independent preparation my labor of independent preparation for nothing. Here, to illustrate my meaning, is the unfamiliar 'Requiem', by Schumann. See how broadly it is written and how delibstatical than of Italian tradition.

If Loeffier's "St. Francis" had appropriate lyricism of expression, Frederick Jacobi, in his "Two Assyrian Psalms," invokes the heathen goddess with a befitting pagan tempestuousness. The Prayer to Bel Marduk evidently presupposes in this deity a predilection for Meyerbeerian grand opera, while the influence of Strauss' "Salome" is ubiquitous in the Hymn to Istar. If the Psalms display strong temperament, they do so often at the expense of the vocalist. Ruzena Herlinger coped with the orchestral waves set in motion by the composer and by Hans Kindler, the conductor, and succeeded not only in making herself heard—a triumph in itself—but

new here if not elsewhere, is fluid, pleasing music of the mildly entermand. I have still more cause for satisfaction. All the songs in the in its neo-Mendelssohnian romanticism.

Ottorino Respighi himself appeared to conduct the performance—the first one anywhere—of his "Trittico Botticelliano," for chamber when I acquired for my own library every modern song of unusual merit as soon as it was published. I got a

London Recitals

At last this most poetic of mouern violin solos is making its way into the concert repertoirs of violinists. Whether it be played with orchestra (as in its original version) or with the concert repertoirs of violinists. This is a very valuation of the beauties of quietude and planissimo. This is a very valuation of the propertoirs as a very valuation of the propertoirs are companiment (as now). pianoforte accompaniment (as now), able possession and not on any ac-it is equally satisfying. To be sure, count to be thrown away, however in the planoforte reduction the tone much he develops in future the coloring of the orchestra is lost. But broad, bold elements of modern conwhen an artist of Ethel Hobday's cert work. caliber is at the plane, the loss is atoned for by the gain in sympathy. Boston Symphony Plays

atoned for by the gain in sympathy. The rapport between her and Jelly d'Arânyi was remarkable.

Of Miss d'Arânyi's own playing it is difficult to speak in terms which do not sound exaggerated. The plain fact is that she belongs to the small company of really great violinists, and at this recital showed herself at the top of her powers. With Jelly d'Arânyi allowances are unnecessary. Her bow arm and left hand are exd'Arányi allowances are unnecessary. Her bow, arm and left hand are exactly right, and her interpretive limitations practically nil. She can play equally beautifully (and did) such diverse works as Tartini's Sonata in G minor, Mozart's D major Concerto No. 4, "The Lark Ascending" of Yaughan Williams, "The Suite Populaire Espagnole" of de Falla (arr. by Paul Kochanski) and a group of small solos that ranged from a graceful "Bagatelle," by Nicholas Gatty, to one of the most mysterious of the Brahms-Joachim Hungarian Dances.

The de Falla Suite word must be said of this de Falla Suite. The material is furnished by the now well-known Canciones Populares. On the whole the violin takes over the responsibilities of the voice successfully. Kochanski has done his work well. Only in one or two instances did the absence of the takes over the responsibilities of the program promised us "prelude to Act II—Imprécation de Thesée—Prelude to Act II—Imprécation de Thesée—Prelude to Act III—Imprécation de Thesée — Imprelude t the brilliant technical effect almost carried the day.

Arrangements of this kind are suc-

cessful by a balancing of give and take. But arrangements which, while ostensibly adding to the resources of a work, are in reality superfluous, have little to commend them. An arrangement by Victor Hely-Hutchinson for voice, plane and string quintet of Arthur Somervell's Song Cycle, "A Shropshire Lad," belongs to this order. It was given a first perform-ance by Bertram Ayrton at his recital in Wigmore Hall on Oct. 5. Ayrton himself has an agreeable voice, and sings intelligently, though without dramatic variety of style. His co-adjutors were those admirable ar-tists Harold Craxton, the Spencer Dkye Quartet and C. Winterbottom, so the performance was more than adequate. Of the many songs formadequate. Of the many songs forming the cycle, only two or three—for example "Bredon Hill" and "Into my heart an air"—gained anything by the resources of string tone color. In the others, there seemed a conscientious effort to veil the fact that the piano was radically the right medium for the accompaniments. The final impression was that for ordinary concert work the songs could a stand best on their composer's own merits. But—and this is an important qualification—Hely-Hutchinson's arrangements would be an asset in radio performance. Here the piano is often so intractable in transmission that the sweeter, more ductile instrumentalists. An opportunity, incidentally, enthusiastically embraced here by Emma Lübbecke-Job and Hans Kindler, who reveled in the cantilenas as well as in the display work of the piece.

Leeffler and Jacobi

St. Francis of Assisi's "Canticum fratris solis" has tempfed many composers into musical expression, but is still to receive a musical setting commensurate with its simple grandeur and naive loftiness. Charles Martin Loeffler has approached his Martin Loeffler has approached his of ron rothing. Here, to illustrate

Attwood, truly enough, started with a good voice; but with something agood voice; but with something a good voice; but with something a good voice; but with some lovely warmth in their tone which

seemed new.
Chopin-Liszt Recital A rarely heard work lent a touch of novelty to Edith Walton's Chopin-Liszt recital at Molian Hall on Oct. 5. This was the Introduction and Polonaise Op. 3, for cello and piano-forte. It melts with sentiment, and Jacques van Lier and Edith Walton gave it the requisite elegance.

For Chopin's B minor Sonata Miss the sustained line and exalted mood which Miss Attwood showed me. For still another, an explorer in modern music is the very person who can solve the problem of vocal execution, hitherto rather responsible defeated.

Choose a Piano

With This Action OUALITY in the piano action means

quality in the plano. For the piano action is the very heart of the instrument! Manufacturers who build worthy planos are fully aware of the importance of using a fine piano action to match the quality of their instruments. For this reason, leading American makers have used the Wessell, Nickel & Gross piano action for upward of half a century. OSE TEA GIFT SHOP. CLOSED SUNDAYS

Because it is the world's highest-priced piano action, the Wessell, Nickel & Gross action is naturally found only in the better-grade instruments. Music lovers everywhere, realizing the significance of these facts, are insisting upon the Wessell, Nickel & Gross piano action.

THE HOME FORUM

Keller, Poet and Novelist

As a poet, Gottfried Kelier has gained favor because his choice of subject, his expression, diction, rhyme and rhythm are all charming. As a novelist he displays firmness, delicious humor, surety, tenderness and sympathy; and the ireshness and vitality of his work have a universal appeal inasmuch as the heart of a poet in a prose writer makes for charming results also. Although born in Switzerland, he writes in a pure, well-chosen Ger-Although born in Switzerland, he writes in a pure, well-chosen German, and refrains from the use of the Swiss home dialect. Although writing was obviously his vocation, he struggled for some years with the effort to become a landscape painter. When he finally realized that his sketchbook contained more verses than drawings he yielded his own strange preference and proceeded to strange preference and proceeded to develop his talent of writing, after which it was not long before his lyrics and essays attracted attention. Heidelberg. Later he spent several his artistic and religious development. This book he revised in later childhood the name of Goethe received his reverence and great was his joy when one morning he found the entire thirty volumes of Goethe's "Martin Salamander," he criticized works on his bed. These he read and studied, and continuously discovered new treasures in them. Little did he keep that the that one day it would be the state of the first edition. SCIENCE SENTINE

wheat is quickly cut and tied in sheaves, and the sheaves placed in

His first novel cost him five years of labor. It was entitled "Green small Government allowance en-led him to attend the University of gles in the choice of a profession, and Henry," and depicts his own strug-

Keller's fame increased on a more solid footing when he issued the first volume of his tales about Seldwyla folk, which deal with the life of the simple inhabitants of a typical but imaginary Swiss village. Exquisitely he blends an unexpected humor with the more serious aspects, and so generally keeps short of the tragic. In like manner he tempers the romantic with the realistic in such a way as to present most likely tales. In the introduction to the first volume of Seld-wyla tales he writes.

wyla tales he writes:
"The name Seldwyla means in an-"The name Seldwyla means in ancient language a sunny, delightful nation in the world. I mean our pubplace, and it is thus the city so named lic school system of free education; lies somewhere in Switzerland. It still rests unchanged amidst the old our freedom of the press; and our still rests unchanged amidst the old city walls and towers of three hundred years ago. Its situation is beautiful; surrounded by green hills that open to the south to let in sunshine, but no rough breezes. The woods round about belong to the commonwealth which is prosperous, although no one knows how the citizens made a living all these centuries. Yet they add lived for eleven years in the no one knows how the citizens made a living all these centuries. Yet they live well and comfortably. It is not my intention, however, to write in this book the stories that lie within the scope of the character of these folk, but rather some that happen in between, as an exception, so to speak, and yet could only happen in Seldwila."

In introducing the second volume or cares—that his city was crist.

"Since the first half of these tales has been published seven cities in Switzerland are disputing which one of the seven is meant by Seldwyla, and each one of them has offered the author honorary citizenship if he would declare himself in its favor. He sought to pacify them, however, by stating that he already had a home city which ranked not below any of them, and that from every city and valley in Switzerland there rises a tower of Seldwyla; that the material that it was named New Amsterdam; that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for forty years, from 1625 to 1664, it was governed entirely under that for tower of Seldwyla; that the material has been drawn from all of them, has been drawn from all of them, and mayhap even from across the Rhein. Meanwhile the character of

other one. Litigation follows and tent influence in his life. The one farmer and the daughter of the other are suffering from the unreasonableness of their elders. This our histories lie very close to us, is other are suffering from the unrea-sonableness of their elders. This draws them closely together and terminates in marriage, but most read- fluential nation in commerce, art, more pleasing ending; so with a sigh the reader lays the book aside and ought to be wise enough to see that part that the Netherlands played in quarreling over a fence line almost always ends disastrously, which,

doubtlessly, is exactly what the author intended, and herein, without question, lies his art.
It appears that Gottfried Keller fathomed the proclivities of his country people, and wrote antidotes in the form of novels. Teaching morals without being pedantic or pedagogi-cal is an art, and masmuch as the Seldwyla stories have been called most delicious bits of short story telling, he evidently achieved that

In "The Smith of his Own Fortunes" the most novel situation is presented. The newly prosperous Johann Poly-carpus Adam Litumlei, with the help of a newly discovered distant relative, Johann Kabys, tries to manufacture and write out a family tradition to support and bear out the newly actions of this document, which is to be found at an opportune moment in the iron chest wherein they hide it, and which they designate as the sea. The eucalyptus trees do not refamily archives. The humor of the names is delicious. Litumlei might the translated into Fol-de-rol, and be translated into Fol-de-rol, and the seasonal trill of a song sparrow can be sent the presence of that hotel, and the same chorus of the view of the jubilant house finches with an occan that used to be theirs. Instead casional trill of a song sparrow can be sent the presence of the view of the jubilant house finches with an occan that used to be theirs. Instead casional trill of a song sparrow can be sent the presence of the view of the jubilant house finches with an occan that used to be theirs. Instead casional trill of a song sparrow can be sent the presence of the view of the jubilant house finches with an occan that used to be theirs. Kabys means cabbage. Thus John Cabbage was to become the legal heir Cabbage was to become the legal near of Johann Polycarpus Adam Fol-derol in recognition of his faithful services. Amusing, too, is the coat of arms which the intrigants design, and

Consistently the author keeps every occurrence, every plan and all conversation in a strain of the ridiculous.

As may be expected, the entire and merry-go-rounds. The ice cream black-headed grosbeak sang a joyful

Harvest Song

(Field Mice) For wealth of golden grain All safely stored away; And that which fell again From carts on harvest day: For winter store secure

Isle of Wight

We have been here over a week. thousand marks he paid Isabella de Fortibus for it: I don't wonder her heirs tried to get it back! But I wouldn't be selfish with my beloved island; I'd let the trippers—though I don't see why they aren't called char-à-banc-ers"-come to Newport and Ryde and Yarmouth: but this 'Ye Kynge's Towne of Brading" rest in peace until such time should rest in peace until such time as I drove in my coach and four to did in "Children of the Ghetto," disturb its quiet, and I'd live at Chale in the old Abbey Farm, a gray fourteenth-century structure with stone floors and stairs, fine Gothic doorways, and, what is very unusual

hereabouts, a buttressed barn. Chale, to my mind, is the most satisfying place on the whole Island, centuries. Shanklin Old Village is oversophisticated, and even Godshill oversophisticated, and even doubtle to the operation of simple musical instinct a bit self-conscious, while the anworking off along the tract of rhythmic proportion and harmonic relation. The vast difference in the grade of results attained is due to But to walk down the Blackgang the capacity of the composers. The road, high white cliffs behind you, simple man giving himself up to reverie and being gifted with a certhe bells ringing for evensong, and tain amount of musical feeling, pro- see, against the sunset. Chale church duces a commonplace melody of standing much as it did when it was serious import or of lively rhythm according to the nature of the chester in eleven hundred and forty reverie in which he indulges. This is —well, I cannot wish any lover of the him according to the nature of the nat to him a complete expression of his the past a happier memory than mood, and it is received as such by

Still, it is all so beautiful-mar-A Bach, a Beethoven, or a Schu-mann, giving himself up to a tonal out of the walls; geraniums and reverie, will also arrive at more or fuchsias climbing almost to the less sympathetic melodic forms pro-portionate to the mood of the com-dahlias, asters, roses, and multicolposer and the idea which he is ored begonias such as we never see seeking to bring to expression; but at home. Each drive or walk is a instead of his reverie terminating at the end of one or two periods, as is downs, the warm stubble-fields that poor Keats praised with wistful af-fection, the narrow lanes, and the man . . . he goes on for a series of periods, and perhaps develops quite a long discourse, all having relation to the simple conception with which he started and to a fundamental laden with blackberries, green and till spirit of the faith.

Self-Expression

Written for The Christian Science Monitor

expression is often raised, frequently, it seems, without adequate understanding of the question involved. The urge of what Paul was pleased to call the "natural man" to the more sharply drawn. That which originates in material belief is of the flesh, fleshly, and pertains not at all the state of the flesh, fleshly, and pertains not at all the state of the flesh or the flesh of the flesh or the flesh of t yet, if men are to live in a society, offspring and likeness. many of these inclinations must be curbed. The plea for right of self-expression regardless of the rights "It is the spirit that quickeneth; the of others is the cry of mortal sense: ts way regardless of the restraining influence of conscience, the moral between the urge for self-expression and conscience, a conflict, be it said, which many find to be both persistent and, at times at least, violent.

The situation, however, is not hopeless; nor is it even as severe as may at first appear. The teachointing the way out of the seeming cessity of demonstrating the dominion of the spiritual and moral forces over the claims of the flesh, manifested as the natural tendencies of to escape. nortals. "Cease ye from man, whose of the so-called "natural man"; that the exercise of spiritual sense is, the flesh would cease to cry out.

their verdant covering. Most of cast out. them claim a fifteenth-century origin, and there is one at Godshill that the oldest inhabitants say is a thouther of the oldest inhabitants say is a thouther of the oldest inhabitants. The consciousness recognized by disconnections of the oldest inhabitants and consciousness recognized by disconnections. some of the windows are geometrical and at least a century earlier. In the and motors are too tantalizing: they understand this, the use of the windows are geometrical and motors are too tantalizing: before the trippers begin to desolate the land, walk till I'm tired, and stop at all the attractive wayside inns. They have such pleasant names: "The Hare and Hounds," "The Castle and Banner." "The Sportsman's Rest," and "The Trav-We have been here over a week, and we love it! We motored from but don't they sound delightful Cowes through gentle hamlets, each Most of the houses, though, have succeeding one prettier than the last, with Godshill and Yaverland "Fair Lawn," with a narrow pocket-handkerchief of green between Manor for climaxes. The high, chalky downs, crowned with green. Cliff," at the top of an imperceptible are a pure delight, and the sweep of the sea from Shanklin to Ventnor is too beautiful for words. I now realize the fatal mistake I made in well, an Englishman's house is his realize the fatal mistake I made in what he pleases!—From "Collector's not anticipating Edward the First in his purchase of the Isle of Wight; it is worth even more than the six Leek Carrick.

Zangwill's People Nearly twenty years later Zang-

will gave us "Jinny the Carrier," a very charming story of mid-Victorian range of cliffs between Shanklin and life and character in rural Essex; The Needles I'd keep for myself, but his finest, most remarkable work in fiction has been done as the inwhimsical, grotesque, broadly and grimly humorous tales of "The King of Schnorrers,' brew mendicant Manasseh Bueno Barzillai Azevedo da Costa, and in the masterly little stories of light and shadow that make up the "Chetto Tragedies" and "Ghetto "Ghetto Tragedies" and "Ghetto Comedies." He has his unique place in letters as the novelist of London's modern Jewry. Aldgate, White-chapel, Hoxton, Dalston, all the roads and byways, mean lanes and squalid squares there and there are a world large and varied and such stories of the children of his fancy, the poor of the Ghetto, their profoundly simple piety, their patience, self-sacrifice, humble durance, human kindness, as in his subtle studies of those "Dreamers of the Ghetto," Heine, Lasalle, Spinoza.

and other seers and prophets of lat-ter-day Israel. But he is too much of an artist to suppress anything of the truth, and dealing with his own people, actual or imaginary, he shows them . . . as they are. . . He is steeped in Jewish tradition, and detail of his pictures with most me ticulous realism; he is ready enough to ridicule obsolete racial bigotries and ancient customs that have lost

mood. . .

Moreover, Bach, Beethoven, or Schumann, in bringing their tonal mood to expression, will permit themselves all sorts of freedom in bringing together unexpected motives, rhythms, or chords, and the result, the late of Wight and make constant to the state of the Longitude on the Island this winter.

And then the small thatched cottages nestled against reddening origing together unexpected motives, rhythms, or chords, and the result, the late of Wight and make constant to the Longitude of Longitude of Longitude of the Longitude of Longitu the Isle of Wight, and make constant notes of the dormer windows, the little jutting porches, and the slop-stories, I would name "They That

ANOTHER BEAR DRIVE SENDS

Special Pressure Exerted Against U. S. Steel-Closing Weak

NEW YORK, Oct. 29 (49)—Irregular movements at the opening of the stock market today were turned into a definite downward trend when persistent hammering of United States Steel by the bear element forced it below 129, the lowest price reached since its high price of 160½ was attained about two months ago.

Contributing causes of the reaction were the publication of some more disappointing third quarter earnings reports, signs of increasing unemployment shown by reduction in the working forces of Colorado Fuel & Iron, and the omission of the usual extra dividend on Pure Oil, exemplifying the current difficulties under which the petroleum industry is laboring.

Early powerful support of General Motors and General Electric, which have been conspicuous in the recent declining movements, was eventually overcome under the battering received by some of the speculative shares. Another drastic drop of 27½ points in Rossia Insurance to 145, following the sensational fall yesterday after it had hit 194, had considerable weight in shaping speculative ventures in other stocks.

shaping speculative ventures in other stocks.

Laclede Gas broke 11½ points, Houston Oil 10, du Pont 9, Colorado Fuel 6, Lima Locomotive 5, and a number of others 3 to 4 points.

The closing was weak. Trading was unusually heavy for a Saturday short session, total sales approximating 1,100,000 shares.

Week-end profit-taking gave the bond market today an irregular tone, but fluctuations were narrow. The week's new issues, amounting to about \$185,000,000 fell considerably under last week's high aggregate, but continued to offer sharp competition to the listed market.

Buying of some of the leading investment railroad liens was again apparent, notably in Delaware & Hudson 5½ and Florida East Coast 5s. Skelly Oil 5½s and Consolidated Gas 5½ also were under moderate accumulation.

Minneapolis & St. Louis 4s and Sea-

Minneapolis & St. Louis 4s and Seaboard 6s were under pressure, and there was some liquidation of Dodge Bros. 6s and Chile Copper 5s.

Firmness of French obligations featured the otherwise irregular foreign group. Serbian 8s and Japanese 6s inclined to heaviness.

There was little business in the Federal Government list. Foreign exchange opened irregular, with Spanish pesetas down 2 points. Demand sterling ruled close to \$4.86 23-32, and French francs slightly above 3.924 zents.

GRAHAM TRUCKS BIG SALES
DETROIT, Mich., Oct. 29—Greater
business activity throughout the country
is indicated by the present record demand for motortrucks shown in the reports of Graham Brothers, the truck division of Dodge Brothers, Inc. For the
two weeks ended Oct. 22, 2969 Graham
Brothers' trucks were shipped to dealers
on customers' orders. This is the largest
two-week period for Graham Brothers
this year.

Autogiro Off for a Flight

been going on steadily. The great point stressed by Colonel Josselyn was the great factor of safety in flying the autogiro. It is free from that great bugbear of air pilots—the

loss of flying speed. It is not depend- adventure as well as those fond of LONDON—Little has been heard lately of the Clerva Autogiro airplane but this does not mean that the company which has the British rights has been idle. The Air Ministry too has been idle. The Air Ministry too in fight less attention to the company which has the British rights has been idle. The Air Ministry too in fight less attention to the company which has the British rights has been idle. The Air Ministry too in fight less attention to the company which has the British rights has been idle. The Air Ministry too in fight less attention to the company which has the British rights wild life. The Air Ministry too denote the fight of the clerk at the same that as well as

has been idle. The Air Ministry too has taken a hand in the experimental work which has to be done. When Senor de la Cierva brought his machine over here last year he did not claim that it had reached its final form, though enough was seen of it then to cause a great stir in the flying world.

In conversation recently with Colonel Josselyn of the Autogiro Company, a representative of The Christian Science Monitor, learned that the work of experimenting has been going on steadily. The great effected by the engline of the pro-

Radio Program Notes

RESPONDING to requests from all parts of the country, the sponsors of the Maxwell Hour have acceded to the demands of radio listeners hitherto beyond the range of Blue Network stations, and have added 10 additional stations, making a total of 25 soon to transmit these programs. In order to obtain the additional facilities, it was necessary a total of 25 soon to transmit these programs. In order to obtain the additional facilities, it was necessary

additional facilities, it was necessary to change the night of radiocasting, and starting on Thursday, Nov. 3, Maxwell hours will be heard on Thursday nights instead of Wednesday as formerly. The hour of radiocasting remains the same, 9 o'clock, eastern standard time.

This chain, the largest ever to be banded together weekly under the Blue Network headed by WJZ, New York, extends from Boston in the East to Omaha in the West, and from Minneapolis in the North to WCCO, Minneapolis-St. Paul; WHAM from Minneapolis in the North to Dallas, Tex., and Jacksonville, Fla., in the South.

WCCO, Minneapolis-St. Paul; WHAM Rochester; KVOO, Oklahoma City-Tulsa; WBAP, Fort Worth-Dallas;

ment. In addition to the two times for extended periods and allarge groups, instrumental and vocal ways to study the extraordinary and soloists as well as smaller groups of abundant animal life of that great

9 to 10 p. m.

A capable group of N. B. C. artists have been obtained to present this program. They are Alice Forsyth Moser, soprano, Zoe Carl Tark, contralto, and Purcell Mayer, violinist.

dition, they mantain that there is no instrument now in use that one of them cannot play. When they appear on the program of WGBS, the Gimbel Brothers station at 10:50 p. m. on Thursday, Nov, 3, they will play classic jazz on the plano, will do some soft-finger banjo specialties, some trumpet work, and various other musical novelties. The Tree Cresting of the sounder the proposed merger of the sounder that the sounder the proposed merger of the sounder the proposed merger of the sounder that the sounder the proposed merger of the sounder the proposed merger of the sounder the proposed merger of the sounder that the sounder the proposed merger of the sounder that the sounder tha musical novelties. The Three Cres-cents have been heard in New York and the middle West, and have been headliners in vaudeville.

+ + + Rudolph Gruen, American pianist and composer, will play Grieg's "A Minor Concerto" in the "Half Hour With Great Composers" program through the Red Network on Thursday evening, Nov. 3, beginning at 8 o'clock, eastern standard time (7 'clock central standard time). Mr.

Dallas, Tex., and Jacksonville, Fla.
in the South.

To celebrate the addition of the new stations and the change in radiocast nights, a gala program has been arranged which will introduce all of the Old Colonel's Musical Family to the new comers in the audience. This group of entertainers will be under the direction of Nathaniel Shilkret and will offer a program which he has described as one of "colorful classics." The works of such great masters of classical composition as Beethoven, Bizet, Saint-Saëns and Rubinstein have prominent positions in a list of selections that run from the romantic Rustic Wedding Symphony.

The orchestral "background" of the program will be furnished by the concert orchestra, of 35 instrumental lists, while the mixed chorus of 20 voices will act in a similar capacity for the vocal parts of the St. Louis Symphony Orchestra. The next year he was the soloist and its said to have been the youngest to have ever appeared with that or chestra, of the service of the science of 20 natural history talks, dealing with the animal life of the said to have been the youngest to have ever appeared with that or chestra, of Classics." The works of such great masters of classical composition is a solone of "colorful classics." The works of such great masters of classical composition is a list of selections that run from the romantic Rustic Wedding Symphony. The orchestral "background" of the program will be furnished by the concert orchestra, of 35 instrumental lists, while the mixed chorus of 20 voices will act in a similar capacity for the vocal parts of the entry of the vocal parts of the en tional Broadcasting Company an-

This program will be heard by WEAF, New York; WFI, Philadel-phia; WRC, Washington; WGR, Buf-falo; WSAI, Cincinnati; KSD, St. Louis; WHO, Des Moines; WOW, Omaha; WDAF, Kansas City.

+ + + The presentation of announcements and programs of the American Le-gion, department of Pennsylvania, by radio has assumed such an important part in the life of Pennsylvania legionnaires that the Philadelphia County Committee have designated unification plan. They are the Min-WIP. Gimbel Brothers in Philadelphia, as the official Ameri-

can Legion station. Beginning Tuesday, Oct. 25, American Legion announcements were radiocast at 8:10 p.m. Every third northwest," Mr. Budd said. "In fact Thursday of each month, from 10 to such a picture could not be complete 11, will be given over to the radio-casting of entertainment features merce Commission will have to give furnished by the American Legion posts throughout the eastern part of the State of Pennsylvania.

Constructive Ways of Peace

DOPULAR support by the people of England seems assured to Viscount Cecil at the very beginning of his campaign to emphasize the necessity of progressive disarmament as a guarantee of peace among the nations of the world. The first public meeting called to advance his plan was attended by so many intent upon hearing the speakers, among whom were Mr. Lloyd George, Mrs. Philip Snowden and Alfred Duff Cooper, that it was necessary to hold an overflow meeting. The gathering was nonpartisan, it is explained, and was representative of Liberal, Labor and Conservative sentiment.

The keynote of the meeting seems to have been summarized by Mr. Lloyd George in a resolution which declared that the drastic limitation of armaments is a vital necessity to civilization, and especially to the British Empire. The failure of the recent three-power conference was deplored. Incidentally the opinion was expressed that "international disarmament will never be attained by mere acquiescence in the views of technical experts, but only by a bold policy of arbitration and constructive peace." Speaking previously at the observance of the anniversary of Trafalgar, Lord Cecil said: "Without disarmament—that is, the reduction and limitation of armaments by international agreementthere can be no hope of enduring peace in

It is not professed by the champions of disarmament—or the voluntary limitation of armament—that no way shall be provided by which national rights can be enforced or wrongs rectified. More and more clearly the realization is being gained by the people of every country that by means of arbitration, with assurance to both the weak and the strong that they will be dealt with fairly and justly, the folly of remaining always armed and prepared for even defensive combat has at last been shown.

Since the failure of the recent disarmament conference to reach an agreement there has been a noticeable tendency in both Europe and the United States to consider, at least speculatively, the possible results which might follow the impasse. But to the credit of responsible thinking people everywhere it may be said that, as they regard even the remote prospect of continuing a resort to force in the settlement of any future international disputes, they return hopefully and at once to the contemplation of some plan by which this can be avoided. emissary of this newer and better way, Mr. H. Wickham Steed, publisher of the Review of Reviews of London, in an address recently delivered in New York, made it convincingly plain that Great Britain would not tolerate a policy of naval rivalry with the United States. He expressed the reassuring view that the failure of the Geneva conference in no way reflected the real British attitude toward America. In apparent agreement with Lord Cecil, he placed the blame for that failure at the door of the British Ministry which, he said, allowed its negotiations to be conducted by an admiralty rather than a diplomatic group.

The trend of thought and sentiment, which seems to be unmistakably indicated by the utterances of representative spokesmen in Europe and America, is toward a convincing realization that the measure of international comity shall no longer be indicated by the number, more or less, of any nation's battleships or cruisers. These implements of warfare, it is realized do not assure freedom from strife, neither do they aid in preserving and assuring a peace enforced

The Citizens of the Future

RE parents in general seizing in their homes A every opportunity to help their children to acquire an international sense of values, to have a lively appreciation of other peoples and races, whether they be in their midst or beyond the border lines of their country? Such is the point of a question put recently to an audience of men and women interested in building for permanent peace by Oliver Dryer, general secretary of the International Fellowship of Reconciliation. The training of the internationally minded man and woman, said Mr. Dryer, begins in the home when they are

The comment might be made that the American home, because of vast immigrant groups of city and countryside, has in this respect a particularly significant service to render the younger generation, if the tourist streams through England and western Europe, the minority entities of the Slav states, the Indians of Central America, the racial medleys of the Orient, and similar situations elsewhere were not simultaneously recalled. Essentially may not this question of international emphasis in the home well be conned by every thoughtful parent the world over, and the younger generation thereby be made far better citizens?

Countless proofs of the spontaneous interest children take in the affairs of children of other nations are on every hand. This capital on the credit side of international understanding and world peace can be made to pay dividends in rows of figures even where the school and neighborhood are not co-operating, if the home is on the alert to make sound investments in right attitude. Furthermore, in those centers where the school is likewise awake, the home has unusual opportunities for its good work. But how subtly is the child's point of view colored by casual comments of those around him! A disparaging remark, thoughtlessly or jokingly passed, concerning the Italian vegetable man, the Jewish neighbors, the Scandinavian workmen crowded into the street cars, may have an unreckoned effect upon this potential international friendliness of children.

That commerce, invention, and their resultant close interweaving of the economic and political fibre of peoples has brought nations together with amazing rapidity is by now a truism. Demanding, as it does, a fundamental change in the adult attitude, it is no great wonder that genuine international thinking is yet for most persons an ideal rather than a present attainment. But certain it is that if the world is to progress soundly while it trades, travels, invents, and meets to discuss political and social adjustments, nation with nation, the younger generation with its even greater opportunity and responsibility in the years to come, cannot afford to be hampered by time-worn insular, national, and racial prejudices. The future calls for citizens who can see across border lines, and verily the home has a significant part to play in their making.

Testing Time in the Balkans

THE Balkan Peninsula is again the scene of a serious international situation. The Macedonian Revolutionary Organization, which at intervals, for more than a third of a century, has disturbed the peace of the Balkans and troubled the diplomatists of Europe, is again trying to stir up antagonism between two neighboring and related peoples.

Macedonia constitutes most of that area in southeast Europe which up to fifteen years ago bore the name of European Turkey and was inhabited predominantly by Slavs, Turks and Greeks. The Slavs, more than 1,000,000 in number, were considered by most observers, diplomatists, travelers, newspaper men and mission-aries, acquainted with that part of the world, to be Bulgarians or at least more nearly related to the Bulgarians than to any other Slav group. Naturally the Bulgarians claimed them. As far as they themselves had a national consciousness it was Bulgarian. The Greeks also claimed them as Slav-speaking Greeks.

Toward the end of the last century there began a keen struggle in Macedonia for liberation from the Turkish yoke and for the arousing of a pronounced Bulgarian consciousness among the Slavs. The teachers in hundreds of Bulgaro-Macedonian schools and the priests in hundreds of churches with a Slav liturgy and the Macedonian Revolutionary Organization were the leaders in this struggle. The measures employed were revolutionary in the most literal sense. Against the Slav teachers, priests and revolutionists fought Greek teachers, priests and revolutionists often in collaboration with the Turkish administration. The Serbians entered the arena late and did not carry on so vehement and extensive a propaganda.

After the Balkan wars and the World War,

Macedonia was divided among the Bulgarians, Serbians and Greeks, the Bulgarians getting the least and the Serbians the most. As a result of this partition the Macedonian Revolutionary Organization continued its activity in order to "free" the Macedonians from the Serbians as it had once fought to free them from the Turks. The organization claims that it is made up of the Macedonians living in South Serbia, who, it alleges, are displeased with the "intolerable" Jugoslav régime and who are determined to acquire liberty at all costs. The Serbs declare that the people in Serbian Macedonia are not Bulgarians, that their language is nearer to that of Serbia than to Bulgarian, that they are not displeased with the Serbian Government, that they are entirely loyal to Jugoslavia and have no desire to be "freed," that the Macedonian Revolutionary Organization exists only in Bulgaria finding no support among the people in Serbian Macedonia, that it has got control of the Bulgarian Government, and that it is directed and financed by Italy to further the interests of that state. So the Belgrade Government has repeatedly demanded that the Sofia Government take drastic measures and put an end to the activities of the Revolutionary Organization, which it claims is harbored by Bulgaria to stir up trouble in Serbia. At the very least, Belgrade demands that Bulgaria prevent the revolutionists from crossing the border into Jugoslavia.

Bulgaria answers that her army has been so reduced by the Peace Treaty that she cannot keep conspirators from crossing her borders in wild mountainous areas and adds that Jugoslavia with her large army ought to be able to guard her own boundaries and keep peace within her own territory.

These diplomatic discussions have been going on for a long time, but now after a series of flagrant acts of terror public opinion in Serbia is much aroused, and demands that efficacious measures be taken. The Bulgarian Government, realizing the gravity of the situation, has promised to do everything possible, but it is faced by an extremely difficult problem, because the Macedonians in Bulgaria are exceedingly bold and energetic, are well organized, ready for any sacrifice and convinced of the sacredness of their cause. Since they are refugees they all have personal grievances and aspirations, and because of their frugality, energy and determination they exercise a great influence in Bulgaria. They will not tamely submit to restrictions and cannot be easily repressed. The following months will be a testing time for Bulgarian statesmanship and European diplomacy. Fortunately the government at Belgrade is neither precipitous nor bellicose.

Museum Lecture Tours

7 7 ISITING a museum used to be, to many people, rather a dull affair. Nowadays, however, it is more likely to be an interesting adventure. The free lecture tours which take place daily in some museums and picture galleries have revolutionized the attendance at these places. They demonstrate to the public that seemingly "dry-as-dust" exhibits are full of historical and practical interest, and that museums are really palaces of wonder instead of institutions of boredom.

It is extraordinary how elucidating a few words of explanation can be. For example, an early English chair, which one had hitherto regarded as merely typical of a certain period, is endowed with fresh interest, and visions of the past are conjured up when one learns that its design was influenced by the trend of milady's fashion, and that the reason for the undue width of the seat was comfortably to accommodate her farthingale. A prehistoric treasure becomes far more than a rusty piece of metal when one hears that it was the seal of an ancient Chaldean and the forerunner of the modern visiting card.

What makes these lecture tours so delightful is that one need not be a student to appreciate

them. An ultraclever person might feel appalled at the idea of listening to a discourse on special palæontological and stratigraphical collections, but even the tyro would find them comparatively simple; and his general, if not his particular, knowledge would be considerably increased.

What unexplored realms of general knowledge are opened up by these lectures, and in one short hour how much may be gained by the exposition of treasures of learning and art, accumulated along the centuries and reduced to simplicity by experts. A talk on metaphysical poets or Elizabethan seamen, with paintings of historical rather than artistic interest to illustrate them; a lecture on the Pre-Raphaelites or symbolism in design, initiation into the arts and customs of ancient Egypt, the origins of European architecture, the marvels of natural science or of zoology, geology, or botany, are only a few of the many fields of knowledge which these museum and gallery lecture tours cover. They open up new worlds to the listener, and are of inestimable value in enabling one and all to view museum and picture gallery exhibits less superficially and more intelligently than might otherwise be the case.

A New Field for Art

THE artistry with which American architects have designed gasoline filling stations, garages, and even water towers, might well be extended into another field—that of the huge tanks of companies selling illuminating and fuel gas.

These barren cylinders rising to a height that obtrudes them on the horizon with complete violation of scenic harmony, often constitute a veritable blot on the American landscape.

There have been notable examples of the conversion of tanks and standpipes of water com-panies into handsome monuments by surrounding them with concrete walls, adorned with pleasing columns, cornices and cap stones. Some have been provided with inside stairways leading to observation platforms, whereby they have become of interest to thousands. While gas tanks could not, perhaps, be turned into observation towers, there certainly is great need that cities and towns demand that such tanks, especially when located anywhere near commercial or residential areas, conform to some degree of architectural suitability.

Russian Music's Debt to America

M ODERN Russian music, which was introduced to western Europe by means of the dance, has an indirect American debt to account for, from evidence of a ballet production lately put on in New York. Igor Stravinsky, whose works, written to choreographic action, have done more for the Russian cause, perhaps, than any other composer's, is found to owe something substantial to an artist of the United States. For though the staging of Stravinsky's "Petrouchka" can be shown by proof of artistic records to have depended on the skill of the Russian balletmaster, Michel Fokine, it can also be shown from its dramatic method to have depended on the inventive talent of Isadora Duncan.

"Petrouchka" has become, indeed, an orchestral score. It has lost, in large measure, its connection with the stage. It possesses the dignity of a symphonic poem. But its theatrical origin may be no more lost sight of than can that of the Wagnerian opera preludes. Concert music, it is nevertheless ballet music, and as such it borrows a certain rhythmic impulse from the Duncan dance. When the men and women assisting Mr. Fokine were Russians, as in Paris in 1911, the effect was one thing; when they are Americans, as in New-York in 1927, it is another. The Duncan influence, slight then, is dominant and pre-eminent now. The stage is ssic in the Duncan meaning. The picture is as Greek as a Pan-Athenaic proces-

Now if the Duncan idea is of American source, it must have a basis somewhere in American civilization. And when American cultural backgrounds are ever so casually examined, a classic perspective shows up inevitably. Not so long ago, American polite learning was founded and instituted largely on Greek literature and art. The Duncan dance, therefore, may in fairness be regarded as a recrudescence of the Greek idea in America. The recent spectacle devised by Mr. Fokine, by the same token, may have been a bringing back of fancies which American youth formerly entertained when turning the pages of Pickering's Lexicon under the lamp.

Random Ramblings

Cadets at the United States Military Academy at West Point are apprehensive lest motorization of the army deprive them of their mascot, the army mule, but at latest accounts there was no report from the Naval Academy at Annapolis that anybody would get

Those individuals who have been claiming that Americans go to Canada to buy liquor will have to start thinking how to answer the statement made by the Essex County Automobile Club of Windsor that only 1 per cent of them buy alcoholic drinks.

With Americans investing more than \$1,000,000,000 a year in European securities, it is apparent that Washington's warning against foreign entanglements is not interpreted today as applying to foreign bonds. 00000

A Chicago school for boys plans a sharp cut in the expense of building a cottage by collecting and selling discarded razor blades. 00000 A fashion note says that fur coats will be worn shorter this year. Many, however, will be worn a little

00000 Next time you run out of gas just be glad you are

Japan's Fontainebleau

OING in late April from Kyoto to Nara one passes

through a country of unsurpassed beauty. At this
season Japan proves worthy of the title, "The Fairyland Kingdom." The famous ode of Matoori states:
"Should a stranger ask what is the most truly representative of Japan, to him I should show the wild cherry blossoms glinting in the morning sun." To be in the Island Kingdom in April is a rare privilege; and to get to visit Nara in the flower season, is an experience long to be

The dark bamboo thickets along the railroad stirred in the warm breeze. Their smooth, green trunks rose straight and high, forming an overhead of delicate leaves. Only small patches of light pierced through to the shaded forest ground. Fertile fields covered the sloping hills, their uniform, green bushes shut away from the sun for the hot season, under a framework of poles and thin matting.
Other fields were green with thriving wheat, yellow with
blossoming rape, or pink with the low, flowering vetch.
Thatch-roof villages were surrounded with luxuriant

shrubs. The camellia made high hedges. Their huge, red flowers were set in masses of glossy leaves. Carefully trimmed azaleas showed their lavender bloom. A few late cherries in blossom, dwarf peas, and climbing grapes surrounded these frame cottages. Buffalo and oxen were busy plowing the damp, brown rice fields. The high hills that protected these valley hamlets were thickly matted with ferns, azaleas and vines, that clung among the pine and

The spring morning brought a parade of color to the village stations. New wooden "gaitas" sounded "clackclack" on the walks, and a bevy of parasols went bythin, silk circles of pink, ruby, white, lavender and gold, retreating like a flock of butterflies.

Nara, the old eighth-century capital, is the Fontainebleau of Japan. A long ascending road leads from the village through acres of green park, under redwood "torii," and ancient trees, to the shrine-covered hills. The wide gravel paths were full of visiting school children in their black uniforms. The bright robes and "obis" of Japan's women gave a touch of medieval romance to the old park grounds. Wistaria, white and purple, clung to the gaunt

Cryptomeria and elm.

The huge camellia flowers hung like red ornaments among the thick woods. Cherries, shedding their petals, spread a confetti of sweet blossoms on the stone way. Tame deer poked their heads from behind stone lanterns; or stood on the great steps to beg for cakes. At the end of the stone stairway, in the shade of red maples and Japanese roses, the path led to "Yado-rigi," the Love Tree.

The streams of clear water sped through the narrow

stone channels of the courtyard. Clusters of wistaria weighed down the bamboo frames that projected from the temple eaves. The encircling cloisters were thickly hung with rusty iron lanterns. Above the quiet court were the high hills, luxuriant with pine, maple, and towering Cryptomeria. + + +

Sitting below the shade of the temple balustrade I watched the Love Tree and the court of "Suji-kai-no-ma. Grafted to the sturdy trunk of the tree were camellia, cherry, plum, and half a dozen flowering shrubs. The strange heterogeneous branches were covered with the names of lovers. The trunk and every twig were white with these tiny paper declarations, each one a vow of faithful

A deer peered down from the upper terrace, rubbing his nose on the balustrade. A temple alms collector, with a long bamboo basket over his head, and a gold and green brocade wrapped about him, stood silently by the red "torii." The "clack-clack" of shoes sounded on the steps outside. The bronze lion facing the archway shot from his cold jaws a fine stream of water, which fell into the pool below his feet with a musical "plash-plash-plash." The easy breeze stirred the vows of a thousand lovers

and swayed the crimson, white and lavender flowers of the bent, old tree. Through passing centuries a vast multi-tude have come to wander among the glories of Nara, to catch sight of "Yado-rigi," the Love Tree, and to meditate in the court of "Susi-kai-no-ma" on the unchanging glory of human love.

R. M. B.

From Desert to Cornfield

HE country round Lyallpur in the Punjab presents a wonderful sight. The fields are neatly cut up into squares, and carefully partitioned off, so that the most may be made of the precious water which the of the Indian irrigation engineers has made available for the thirsty fields. The crops grown are the most valuable for which the area is suited, wheat, cotton and the golden-flowered oilseeds, and the proximity of the great College of Agriculture with its farm attached insures that the species are the best of their kind and produce the greatest

The railway station of Lyallpur is said to be the second largest exporter of wheat in the world, and from it pours away, apparently unceasingly, trainloads of surplus produce to other parts of India and to the rapidly growing port of Karachi.

To realize what Lyallpur, Sargodha and Montgomery once were, one must think of the country to be commanded by the Sutlej Valley system now under construction. Water has begun to flow in the canals taking off from the Suleimanke weir, and gradually by four weirs and twelve canals, deserts the size of Wales in the Punjab, Bikanir and Bahawalpur States will become something like what Lyallpur now is.

In the Bahawalpur State a railway line runs down the margin of the desert close to the riverain of the Sutlej. One or two fortunate stations have sweet wells of their own; others have water pumped to the tanks from supplies some two or three miles away; but the staff of many wayside halts get their drinks from iron tanks brought down the line from more favored spots.

From this line for forty miles southward not a drop of sweet water can be obtained. Away in the distance lies the Hakra, the dry bed of some old river which has long ago lost its supply. Fortunately there is a flow of sweet water underground, and by the rare and deep wells to this sup-ply are placed a number of old forts, built to protect the graziers from Rajputana raiders.

Some of the forts have been in existence for over 400 years. Others date back 200 years, when the Daudpotras (Sons of David) of Bahawalpur first won the country from Jaisalmir. The Hakra bed must have been less de the past for it is by that route that in the first half of the nineteenth century Elphinstone went as Envoy to Afghani-

stan and Shah Shuja came to take refuge in India.

Between the Sutlej and the Hakra there is no water to drink. The rainfall averages only five inches a year, and in very good seasons small quantities may be caught in shallow tanks, but this is negligible. Cattle and sheep can graze within a certain distance of a well on the two margins of the desert, and camels can penetrate still farther into the waste, they surviving without water for some days and their attendants getting their drink from the camel's

Here and there is a bitter well, with water soaked in sulphate of soda and smelling of sulphurated hydrogen which suffices for animal and man who have lived in the desert from childhood; but no Indian, accustomed to the water of the riverain, can drink from such wells. Wild birds and heart are rare. Paying deep and the substantial substanti and beasts are rare. Ravine deer can endure without water for a long time, but the foxes do not penetrate into the

The Houbara bustard, sandgrouse, and occasionally the Great Indian bustard, four feet high, may be seen, if there has been rain to make the grasses grow. Desert larks, wheatears, longtailed tits, and shrikes appear here and there in the course of a long camel ride. The scenery for the forty miles contains not a single tree, not even the the lorey lines contains hot a single tree, not even the stunted acacias which can grow in barren soil if their long tap roots can find water within forty feet or so. There is a long succession of sandhills and saltbushes broken by stretches of hard ground over which the wind keeps the dust in constant movement.

With all this we know from past experience that the canals will bring down water which will fertilize the soil and percolating downward will enable, later on, sweet wells to be sunk. There will be hardships to be endured by the early colonists, but before long the wilderness will be covered with crop, and the wharves of Karachi will have more and more abundance of produce to export.

Mirror of World-Wide Opinion

Names or Numbers?

FROM the Council of Cleethorpe there came a decree that henceforth no house within its bounds should have a name, and those householders who now enjoy the have a name, and those nouseholders who now enjoy the luxury must efface it and in its place put a vulgar, bald number, and if any still clung to a name, if any still went unnumbered, it would be forty shillings and costs. The news ran through the North like fire on split petrol. petrol. It was everywhere felt that what the Councilors of Cleethorpe do today any corporation may do tomorrow, and no man's house is safe. Is not an Englishman's house his castle? they are asking, and cannot a man do what he will with his own? and what is more precious to a man than his dignity? It is very well for co to lay down how a house shall be built and decid much a man shall pay the town for living in it. But what is it to councilors whether the proud householder calls it Eden or number 13? He knows best. If a man has any rights left in this democratic age he has a right to call his house what best expresses his life or his hopes. _London Daily Telegraph.

Typographical Potpourri

ALL the world's a page. And all the men and women Aon it merely characters. They have their commas and their periods, and some in their time cut many First comes the letter I. Strutting and puffing with

his own importance, he sounds his own alarm.

Then comes the E that marks the birth of ease and end of crime, and, strange saw, lies at the begin-

Next strays along the U that stands at the head of union strong, and ushers in all those unhonored and ansung.

And G, with grouch extended, creeps unwillingly to

And G, with ground extended, creeps quantities, school and ends all striving.

While these move on—a strange procession—the line of type is full of queries and the colon, that fails to dam it, gives way until the fuller period comes; and this is succeeded in its turn by some strange capital.

A motley crowd! The exclamation bold, and interjections are the six and the color with the fatherent the wild parenthesis with

tion sharp, while, in between, the mild parenthesis, with no excuse for being, softly and gently interposes; and just to show the outside world, a star sheds its rays down upon some tiresome note that grovels at the bottom. Who knows but when the great revision comes 'twill be all pied and justified no more; or else so full of error, laid on the heaped-up coals, and melted to a dross!-

Brighter Bathrooms

FASHION, which threatens textile industries with one hand, sometimes encourages them with the other. At the dinner of the British Chambers of Commerce in Liverpool a wool broker has just been rejoicing in the fact that, though his trade has lost much by the vogue for shorter skirts, something has been regained by increasing width of "plus fours."

And if wool wins a little here and there, cotton is also not without its consolations. We are now told that there is a growing demand for gayly colored towels and bath robes, in the first place a taste which has been indulged on the Lido and in the south of France, but is now intro-duced into this country by the returned holiday makers The British bathroom is to blossom like a rose and in defiance of the British weather which beats bitterly upon the window. Indeed, there is no place where gayety might more reasonably take root and flourish, for with plenty of warm water and towels which recall the yellow sands or blue Mediterranean, there if anywhere it should be possible to recapture something of our lost summer.

The "priestlike task of pure ablution" will become an affair of greater ceremony than ever when the initiate advances toward the rite in a coat of many colors and rubs himself down with something which resembles a slice from the thick end of a rainbow. Song, by long tradition an exercise inseparable from many bathrooms, should then burst forth with almost incredible vigor; when those who have joined what is—to the rest of the household—"that choir invisible" have also surrounded themselves with the loudest possible charge of rounded themselves with the loudest possible chorus of colors the incentive to song should be irresistible. Gayéty is induced, cleanliness—which is next to godliness—is encouraged, and the cotton trade benefits. What more could be expected from any conceivable turn in the wheel of fashlon?—Manchester Guardian.

Wanted: A Deader Ball

THE bullet-like balls eat up the yards. Either courses will have to sprawl over the greater part of a township to give the sluggers room for full-sized shots, or the ball must be modified to suit present links architecture. . . The ball wanted is one of moderate weight and resiliency that will reward the versatile shot maker in proportion to his art. Limitation of the driving power of the ball will not standardize play, but will rather diversify it and bring back some of the finer shadings of golf.—New York Herald Tribune.

How About a Constitutional Party? To THE CHRISTIAN SCIENCE MONITOR:

Next year the question of obedience or disobedience to the fundamental law of the land, namely, the Constitution of the United States, will be forcibly before the people.

Should neither of the two dominant parties be willing to shoulder its obvious duty, to stand firm for the Constitution and the expressed will of the people under that great document, it would seem that another party, pledged to law enforcement, should be placed in the field. To some the present moment does not seem too early to make plans to this end.

Having this view in thought, it might be well that such a party should not go to the polls under a name which would convey simply a negative thought, such as Pro-hibition Party, but that it should be called by some name which would indicate its positive character, such as Constitutional Party, the main plank in its platform to "The Constitution as it stands."

Constitutional clubs should be formed as soon as possible, and their delegates would be pledged to support our Constitution by the selection of pledged candidates for all public offices.

In no other way, as far as one can now envisage the situation, can the Eighteenth Amendment, together with the federal law to enable its enforcement, be assured of official support.

Worcester, Mass. Now, Here's a Pretty Good Rhyme

To THE CHRISTIAN SCIENCE MONITOR: Algebra provides the following rhyme for "month," probably the only one in actual current English:

A Cambridge student, month by month, Solved binomials to the (x+1) th.

Boston, Mass. E. F. BARRY.
